Additive Manufacturing (AM)

Main AM Contact: Chris Ward, Senior Application Development Scientist, Alpharetta, USA, chris.ward@syensqo.com

APPLICATIONS & MATERIALS

Syensqo Additive Manufacturing (AM) efforts center mainly around three focuses: **developing/evaluating materials** , **printing custom internal jigs/fixtures/apparatuses/tools/equipment** in order to facilitate developmental efforts and customer satisfaction, and working directly with customers to potentially **print prototypes** (either in their desired material or from another material for demonstration purposes).
