

# How to Install the IDBS External Editor

IDBS External Editor Integration is a small component allowing you to directly edit a Microsoft Office document in an experiment (removing the need to download & upload the file at every update !

Please find below the installation guide. It doesn't require admin rights so any user can do it by her/himself.

## 1. Download the source

	<p>Inside the ELN, click on the Edit button of any already existing experiments</p>
	<p>Download the installer by clicking on the bottom left button</p>

## 2. Installation

Double click on the **IDBS External Editor Integration Installer.msi** file you just downloaded to launch the installation.

IDBS External Editor Integration Setup
