

Process

In this section , we will see the systems related to Solstice project and the requirements.

Here we have 2 systems:

- 1) Non ITAR/EAR System(Nextlabs Dev / Qa :NX* Business Role) which contains WDX, WQX, CDX, CQX
- 2) ITAR/EAR System (Nextlabs Prod :PX * Business roles) which contains WPX, WVX, CPX

Please find below the points which needs to be followed while providing access :

1. Every user that is not in US soil must NOT access ITAR Data regardless of the citizenship.
2. User who belongs to US soil can only have access to WPX/CPX
3. User who have citizenship of US but works from Europe can have access to WPX but not ITAR data
4. For getting access to WPX/CPX , user should have clearance to security flag.

Please find below the list security flag which can be assigned to users before granting WPX access:

5. For checking the flag , PP2 client 130 system is required
- 6.If any user ,flag is not cleared , please get in touch with SBS HTR Team and forward an email for flag clearance

Email: sbs.htrsupport@support.solvay

Please use the below format while forwarding:

Name:

Email:

Personnel number:

Manager name:

7.China is not implemented in WPX/CPX/WVX due to compliance reasons therefore, there are only PR* business roles for China and China users must never receive PX* business roles.

8.Chinese Composite Material users must always receive only PR*CHINA* / PR*FENGXIAN business roles, they cannot have access to other locations. **China users are forbidden in WPX** (user location available in GUDSIS)

Note : The IS user who needs access to Solstice , please ask user to get in touch with respective manager and fill the citizenship form which needs to be forwarded to SBS HTR Support team
