

Co\$ta - Package assignment

Co\$ta - Package assignment

>> Back to the [Co\\$ta project](#) home page

[[Main Principles](#)] [[Exceptions](#)] [[Package Derivation Source](#)] [[Unassigned packages](#)]

Main Principles

The determination of the subpackage is done in 3 steps :

1. There is a material code in the posting, then the program assigns the posting using its material group
2. When there is no material code, then the program uses the material group of the purchase order when there is one to determine the subpackage
3. Where there is nor material code, neither purchase order, the determination of the subpackage is done using the cost element of the posting.

Exceptions

- **Samples in PF1:** Postings are done directly in COPA ([Origin flow](#): COPA) in the value field VV151 which is fully assigned to the sub-package P20027.
- **IFRS16 Lease** ([Origin flow](#): WCFI_LEASE): When there is neither article nor purchase order, the determination of the subpackage is done with the segment of vendor (mainly for cars and [BGRS](#) costs).

Package Derivation Source

The dimension "Package Derivation Source" is used to see how the sub-package is assigned to a posting:

- **MATERIAL:** There is a material code in the posting. A material group is assigned in its master data that is itself assigned to a sub-package,
- **PURCHDOC:** There is no material but a purchase order. There is a material group in the purchase order that is assigned to a sub-package,

Link Material group => Subpackage

- < What is package taxonomy (PCK)? > shared by PSL Data and Analytics

- **COSTELMNT:** There is neither material nor purchase order. The cost element is used to assign the sub-package,

Link Cost element => Subpackage

The [Table ZTFI_CESBPKG - Cost elements Subpackages mapping](#) is used to map the lowest level cost element group from the [ZSOLV hierarchy](#) to the cost sub-packages.

- **VFIELD:** This dimension is only used when the [origin flow](#) is COPA. Some postings are done directly in COPA and in some cases the assignment to a subpackage is done based on the value field used for the posting,
 - For instance Samples in PF1 are posted in the value field VV151 which is assigned to the subpackage P20233.
- **VENDOR:** This dimension is only used when the [origin flow](#) is WCFI_LEASE. When there is neither article nor purchase order, the determination of the subpackage is done with the vendor.
- **NERPSYST:** This dimension is only used when the [origin flow](#) is NERP. The subpackage is maintained in the file [TEMPLATE ZCBS_BW](#) that is loaded manually in BW.

Cost Package Derivation Source	Origin Flow	Actual Origin - Conso view (Conv)
COSTELMNT	WBS	75 566 469,19 EUR
	CCA	291 744 181,04 EUR
	OPA	5 746 522,76 EUR
MATERIAL	WBS	-205 136 967,15 EUR
	CCA	124 047 950,15 EUR
	OPA	15 650 379,75 EUR
	COPA	456 400,77 EUR
	FI	18 737 997,56 EUR
	WCFI_LEASE	325 958,95 EUR
NERPSYST	NERP	2 277 437,74 EUR
PURCHDOC	WBS	10 983 820,36 EUR
	CCA	81 940 474,84 EUR
	OPA	31 366 329,32 EUR
	WCFI_LEASE	8 666 977,05 EUR
VENDOR	WCFI_LEASE	453 558,53 EUR
VFIELD	COPA	214 835,91 EUR

Unassigned packages

In some cases a package can not be assigned.

When the assignment is not possible, there is a reason code in the column Cost Sub Package.

- **NC_MATNR (1):** There is a material code with a material group but the material group is not assigned to a sub-package.

In the example, the material group 0112 (2) is assigned to the material code 1062492 (3) however the material group 0112 is not assigned to a sub-package in the transcodification table.

=> The material group 0112 should be included in the table and assigned to a sub-package.

Cost Sub Package		Cost Package		Cost Macro Package		AMOUNT
NC_FIN	NC_FIN	#	Not assigned	#	Not assigned	8,518.00
NC_MATNR	NC_MATNR	#	Not assigned	#	Not assigned	1,139.28
NC_PURDOC	NC_PURDOC	#	Not assigned	#	Not assigned	20,143.65
P20001	Base Salary	P10001	Internal	P0001	People	570,804.66
P20002	Social Charges	P10001	Internal	P0001	People	234,550.70
P20004	Bonus & Premium PSU	P10001	Internal	P0001	People	20,624.34

Cost Sub Package	Cost Package	Cost Macro Package	Material - Material Group		Material	AMOUNT
NC_MATNR	NC_MATNR	#	Not assigned	0112	0112177700	

- **NC_PURDOC (1):** There is a purchase order with a material group but the material group is not assigned to a sub-package.

In the example, the material group 0078 (2) is not assigned to a sub-package in the transcodification table.

Cost Sub Package		Cost Package		Cost Macro Package		Purchase Doc - Material Group		AMOUNT	EUR
NC_PURDOC	NC_PURDOC	#	Not assigned	#	Not assigned	0078	ELECTRICITY SUPPLY	323,571.20	
NC_PURDOC	NC_PURDOC	#	Not assigned	#	Not assigned	0269	TOLLING SVCS	735,655.50	
NC_PURDOC	NC_PURDOC	#	Not assigned	#	Not assigned	0308	ENTERPRISE SOFTWARE	7,830.00	
NC_PURDOC	NC_PURDOC	#	Not assigned	#	Not assigned	0317	GAS /CYLINDER	12,751.20	
NC_PURDOC	NC_PURDOC	#	Not assigned	#	Not assigned	0451	PROD >RAW MAT	5,190.00	
NC_PURDOC	NC_PURDOC	#	Not assigned	#	Not assigned	0587	GAS /PROC SVCS	1,360.00	

=> The material group 0078 should be included in the table and assigned to a sub-package.

- **NC_FIN (1):** There is a cost element that is not assigned to a sub-package.

In the example, the cost element 98120010 (2) is not assigned to a sub-package in the transcoding table.

=> The cost element 98120010 should be included in the table and assigned to a sub-package.

Cost Sub Package						AMOUNT
Cost Package	Cost Macro Package	Cost Element			EUR	
NC_FIN	NC_FIN	#	Not assigned	98120010	VSE FREIGHT ON SALES	2,204.56
NC_FIN	NC_FIN	#	Not assigned	98150890	VC FREIGHT ON RM PUR	
NC_FIN	NC_FIN	#	Not assigned	98150970	SC FREIGHT	832.49
