

CM - Technical Documentation

This section aims to centralize the Technical documentation produced as a deliverable of the project. The goal is the following :

- centralize and describe all the sources to build the CM project
- explain how the datasets are built (datasets used for the main Analyze & DB tab)
- explain all the calculation of the indicators for Analyze & DB
- explain the process, where finding usert manual inputs/parameters (sites, manual inputs...)
- present all the target reports (tables used in Qlik dashboard but also GoogleSheet reports)
