

HR symbolic account mapping

Tasks to be completed when documenting an operation (from creation to publication)

1. Enter the **Title of the operation / page**

2. Add the following Labels:

- Scope of applicability: ww, country_accounting
- Country or group of countries (if applicable): belux, china, france, italy, lam, nam,uk_ie, bulgaria, dach, netherlands, iberia, poland, latvia, australia, india, japan, south_korea, thailand, singapore, new_zealand, emea_transversal, apac_transversal
- Unit and Domain according to the [List of labels to be used in the Finance Service Line space](#)
 - E.g. 1: WW Operation in Financial Accounting under domain "Central Finance Processes & Compliance":
 - Labels to be used: **ww, financial_accounting, central_fin_proc_compliance**
 - E.g. 2: France Operation in Financial Accounting:
 - Labels to be used: **country_accounting, france, financial_accounting**
(for country operations, the Domain is always country_accounting)

3. Fill in all fields as described above

4. Name the title of each section using OPD methodology naming convention - **Infinitive verb without the "to", mainly action verb...something) -" I do something..."**

5. Once the description of the operation is completed, ensure it is approved and published by launching the [SBS-Finance approval workflow](#)

Domain: Central Finance Processes & Compliance

Responsibility area: Coordinate symbolic accounts creation between HR and Finance

<< HR symbolic account mapping >>

1. Objective and Scope

1.1. Objective of this Operation

The aim of this operation is to describe what are the features to have in mind when a new symbolic account to link wage types to GL accounts in Finance environments

1.2. Scope

The scope of this operation is PF1 and WP1 target systems, directly linked to the countries operating Payroll in EuRHeKa system.

2. Definitions

3. Tasks description

The purpose of this operation is to have the customization of T030 table with the necessary symbolic accounts, GL accounts and other features to allow the Payroll interface to run smoothly in the Finance target systems of PF1 and WP1. After this customization, HtR partner should be informed of the adjustments made following his original request, so that the mapping of Wage types and Symbolic accounts can be aligned between Payroll and Finance systems. The Mapping of Wage type and Symbolic accounts is not managed by Finance.

3.1. I receive a request from HtR to create a new symbolic account for a new wage type.

Wage types are the basic elements for payroll. Any operations impacting the payroll are identified in the system using "Wage types". Every time a new wage type is to be created, it must be linked to a symbolic account.

This symbolic account can already exist or not. If not, HtR Payroll team should send a notification and request it to distribution list SBS.FinanceSL-Fin_Acc_SU_GL_Payroll@solway.com, containing all the information needed for a correct mapping.

In the request, there should be an explanation of the reason for the adjustment, background (including the scope, if global or country based), nature of the wage type (accruals, impact in the net paid, no impact in the net paid, without impact in the payroll posting)

I have to take into consideration that the Wage types are defined by country and that the same WT code may have different meanings depending of the country.

Global WT codes exist for WW operations – these can be easily identified because they either are 4G or 9G* (G* for Global).

The link between "Wage types" in HR system and "GL accounts" in Accounting system is managed through "Symbolic accounts"

3.2. I assess the nature of the wage type.

I assess the nature of the wage type and ask for more details if needed. I should take into consideration the following:

Wage types can be grouped into different categories:

- directly linked to the net paid
gross salary elements
social security due by the employee
withholding tax due by the employee
other reduction due by the employee (ex : participation on company car)
net premium
- linked to the salary w/o impact on the net paid
social charges and other advantages paid by the employer
- accruals
Bonus accruals
Holidays paid accruals
Etc.
- w/o impact on the payroll posting
used for calculation of the payroll (ex : advantage on company car, mobile phone)

Based on the nature, we can have to impact only:

1. Profit and Loss accounts (gross salary elements/net premium/social charges and other advantages paid by the employer), with **one symbolic account**.
2. Balance sheet accounts (social security due by the employee, withholding tax due by the employee, etc.) with **one symbolic account**.
3. Profit and Loss accounts and Balance Sheet accounts for the accruals (accruals and reversal of accruals) with **two symbolic accounts**.

There is a direct link between the nature of the account and the transaction:

Transaction
HRC - Expense Account (P&L account)
HRF - Balance Sheet Account
HRK - Vendor Account
HRA - Technical Account

Chart of Accounts	COCA	Solvay - Corporate chart of accounts

A894	NL0	2455025100

3.3. I request the update of T030 with the new symbolic account in the target Finance system.

I request the update of T030 with the new symbolic account, based on:

country;
 company code to impact (if it is PF1 or WP1 system);
 category of the wage type and consequently the nature of the account to impact

After having in mind the country, the target system and the nature of the wage type to be mapped, I request the update of T030 by adding information to the following fields:

- Chart of accounts** (COCA for PF1; Z001 for WP1)
- Transaction:**

(reflects

HRC - Expense Account (P&L account)

HRF - Balance Sheet Account

HRK - Vendor Account

HRA - Technical Account)

- Valuation group code** (corresponds to the symbolic account);
- Account modification** (corresponds to the code of the country modifier)
- GL account debit** ((should be the same as GL account credit)
- GL account credit** (should be the same as GL account debit)

Example of a Balance Sheet modification (premium wage type), for Great Britain, WP1 system:

- Chart of accounts: Z001;
- Transaction: HRF
- Valuation group code: A022
- Account modification: GB3
- GL account debit: 15600100
- GL account credit: 15600100

This request must be addressed to IT-GAC team in the ticket system available, with the information collected above.

3.5. I inform HtR partner of the newly created symbolic account.

I inform HtR partner of the newly created symbolic account by replying from the distribution list email SBS.FinanceSL-Fin_Acc_SU_GL_Payroll@solva.com.

In the reply, identify clearly that the modifications have been done and that HtR partner must liaise with external party so that the wage type is linked to the new symbolic account on PP9 environment side.

End of document.
