

Thermal Conductivity: Hot Disk

Principle

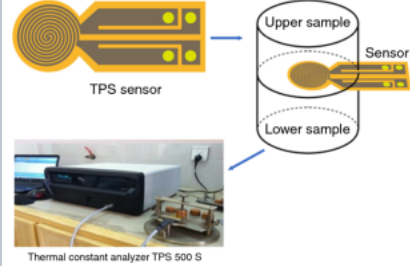

Thermal conductivity is the property of heat transmission of the materials.

Samples are solid plates ≥ 3 mm thick

Capabilities

- Transient Plane heat source (Hot disc) method (ISO 22007-2)

Assets

	Asset	Details
 <p>TPS sensor</p> <p>Upper sample</p> <p>Lower sample</p> <p>Sensor</p> <p>Thermal constant analyzer TPS 500 S</p>	Hot Disk TPS 500S
