The Prompt window

When you insert a query, or click on refresh, or on the "Prompts" menu, the "Prompts" window will open. This is where you can select the data you want to display the report.

If you have multiple queries in the workbook and the option merge variables is unticked (design panel>components), then you have the option to select between :

- Prompt for Workbook : It will show in the same prompt window the prompts for all the queries in the workbook
- Prompt for Data Source : it will show only the prompt for the query that you have selected.

Selecting Values

1. You can select a value with the Match Code (List of value)  or directly insert a value.
2. Prompts marked with a * are mandatory.
3. Ok is ungrayed when mandatory fields are correctly filled in

Selecting multiple values

You can select multiple members as the prompt values for this dimension.

1. Press the button , to add a field for additional values.
2. To remove a selected member, press the button 

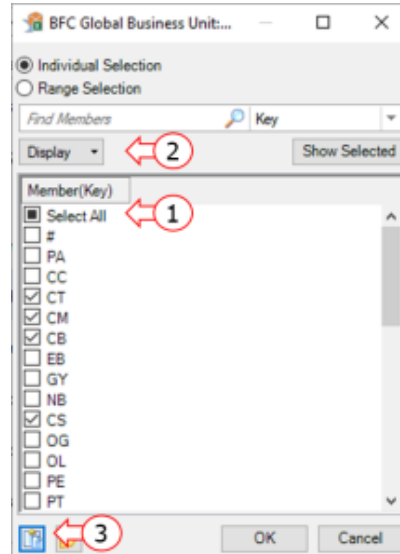

In the Prompt, you'll be able to make a multiple selection from a list that you can paste from Clipboard or from a file:

1. In the Prompt, Select « + » and choose « Add Lines using Filter By Member ».

1. In the Pop up of the selection, **untick** first Select All.
2. Open Display button to choose the correct type either you want to copy text, or Key,
3. In the Pop up of the selection, click to the button to « Paste from clipboard ».

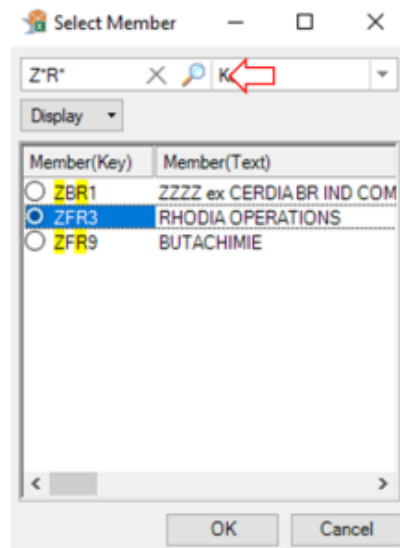

i Members were pasted

Searching for a group Member with selection (*)

By selecting « * » replacing the missing character, you'll be able to find a number of member of your search.

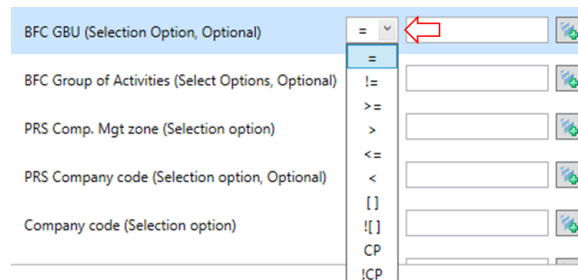

*Example : I want to search all the Company codes that contain Z and R, therefore I just replace the « * » in the name Z*R* => result = ZBR1, ZFR3 & ZFR9*

Selection option

You can select an operator and corresponding members to define a selection for this dimension. The following operators are available:

=	Equal To	<=	Less Than or Equal To
!=	Not Equal to	[]	Between
>=	Greater Than or Equal To	![]	Not Between
>	Greater Than	CP	Contains Pattern

<	Less Than	!	CP	Excludes Pattern
---	-----------	---	----	------------------

Selection of all values

To **select all the values of a mandatory variable**, enter the value : >= # (greater or equal to "#", as "#" is the lowest value that can be found in the system)

Example : I want to have a report with all plants and the variable "Responsible Plant" is mandatory. Enter the value : >= # to select all plants

Specify Value for Prompts

Responsible Cost center = [] []

User Responsible = [] []

* Responsible Plant (Resp Cost center) >= # [] []

View the prompt values in Analysis

Once the report is executed you can check the values of the prompts (and filters) in the "Information" Tab
