

Spend MM Query

1. Context

Spend MM query is now available to all Procurement users. The query has been optimized with new HANA Architecture that should provide improved performance and more accurate data (consignment etc...)

Spend MM could be defined as a simplified version of the PO Follow-up query and it has been used for a pilot to assess its efficiency and provide improved data for the looking forward Dashboard .

The query is based on Good Receipts and Consignments

2. How to access

Spend MM can be accessed through Bex (Excel SAP BW Plugin). It belongs to the Sprint Catalog
