I create a profit center

1. Objective and Scope

1.1. Objective of this Operation

The purpose of this document is to describe the process of creating a profit center.

1.2. Scope

This document applies to all the processes of creating a profit center.

2. Definitions

See [Finance - Glossary](#)

3. Tasks description

3.1. I receive the request to create a profit center

I receive a request to create a new profit center.

3.2. I confirm that the request is made by an authorized requester

Only authorized requesters should be able to ask for data.

In the case of Costing master data, which is the case of the profit center, usually it's a GBU/function Controller.

Check that the requester is an "authorized requester" in document

This list is maintained by the Process Expert Costing assigned to Data Management.

3.3. I analyze and validate the information provided in the request

I check that the profit center that needs to be created follows these rules:

There are 2 types of profit centers in PF2:

1. Reporting profit centers

In PF2, the determination of the [business structure](#) is done in the [P&L](#) using a [reporting profit center](#) that is in the COPA posting. To make this everything works (through interfaces):

- All [material codes](#) should be assigned to a reporting profit center (in the view "costing 1")
- All objects in CO should be assessed to a profit center in COPA

2. Organizational profit centers

All CO objects (cost centers, orders, WBS) are assigned to a non reporting profit center
In WP2 the profit center is used to:

Assign the following variances to the P&L (COPA)

- Variances on purchase
- Inventory differences
- Variances on transfer
- Variances on process order
- Revaluation variances

Split the [Working Capital](#) by enterprise

- Split the accounts payable and the stocks by CGU (Cash Generating Unit)

Calculate some indicators of the industrial dashboard and identify by Value Stream

- Inventories
- Variable costs (the actual ones posted through process order)
- Fixed costs (from the direct production costs center)
- Freight on sales costs (from the P&L and freight on sales cost centers)
- Accounts payable

Note

In WP2, since we can not restrict the usage of the profit center to a certain controlling area, it is recommended that whenever creating a new profit center in a certain controlling area, it's also extended to the VPART nodes in the other active controlling areas.

Profit center master data are displayed with [KE53 - Display Profit Center](#)

PIF level

Standard codification

The codification of a reporting profit center used at PIF level:

- **Letter F**
- **Activity 1 code** - 2 characters of the Reporting Division from SM30 table V_134G, Division code (check in Material Master Data (MM03), tab Basic Data 1, the field Division) + Plant code, to get the correct Business Area.
- **PIF code** - Use the first 5 characters of the PIF code (complete with "X" to reach 5 characters). To identify the correct code, go to **T-code MM03 Basic Data 1** tab, check the **Prod. Hierarchy** field. In **SM30 table ZZRT179 V**, confirm that the **Prod. Hierarchy** code is marked with an "X" in the **Flag PIF** column.
- **Country of origin** - 1 character for the country code of the industrial origin, i.e. where the goods are manufactured - see appendix for the codes.
- A - Austria

B - Belgium

C - Switzerland

D - Germany

E - Spain

F - France

G - Great Britain - UK

H - China

I - Italy

J - Japan

K - Korea

L - India

M - Mexico

N - Netherlands

O - Russia (possible extension to other countries)

P - Portugal

Q - Not used

R - Brazil

S - Finland (possible extension to other countries)

T - Thailand

U - USA

V - Argentina

W - Not used

X - Improperly used for some "3rd parties" and some other strange ones

Y - Egypt, Saudi Arabia, Chile and other miscellaneous countries

Z - Inovyn Martorell - other / future use to determine

1 - Rhodia EMEA region (only for "green" GBU - when production center is not specifically known) - corresponding to industrial origin 9991

2 - Rhodia NAM region (only for "green" GBU - idem) - corresponding to industrial origin 9992

3 - Rhodia LATAM region (only for "green" GBU - idem) - corresponding to industrial origin 9993

4 - Rhodia APAC region (only for "green" GBU - idem) - corresponding to industrial origin 9994

9 - Third parties - corresponding to industrial origin 9997

- **Code packaging** - 1 character (normally a digit) to differentiate - normally odd for packed and even for bulk.

These profit centers are used for postings at the lower level of detail : PIF + industrial origin.

Activity 1 level

Standard codification

The codification of a reporting profit center used at Activity 1 level

- **D + Business Area**
 - Letter **D**
 - **Business Area**
 - Sector code
 - Activity 1 code
 - Free

These profit centers are used for posting at "company code" + "BFC Activity 1" level. Should wait until the Business Area has been created by APDM and is available in PF2_020 before creating the D* profit center.

Profit centers at company & company/object levels should not be used anymore

Before the project SPS (COPA in PF2) there were 2 other types of reporting profit centers:

At company level

They were used for posting at "company code" level for which there was no subdivision between GBU or BFC Activities.

The codification of a reporting profit center used at Company code level was:

- Letter E
- Company code

At company & object level

These profit centers represent the shares of the company hold by other Solvay companies. Can be created for any Solvay companies, operating in the ERP Solvay or not.

The codification of a reporting profit center used at Company code and object level was:

- Letters SCHEF
- Company code

Reporting profit centers at company & company/object levels should not be used anymore

Standard codification

The codification of an organizational profit center

- Letter C
- Plant code

Codification - Standard codification

The codification of a profit center is

- Company code or plant code
- Letter
- Last 4 digits of the IECRA

The recommended practice is to put a Profit Center with "plant" codification in the Master Data of a "plant" Cost Center

Example

Codification of a profit center for Novecare in the plant 8091 Zhuhai

Usually it is created from the 1st day of the current year to 31.12.9999

In PF2, the name of a profit center is critical for the reporting, the rules must be strictly followed.

PIF level

The name of a reporting profit center used at PIF level (F)

- **position 1-3** = first 3 characters of the [Business Area](#) (Sector code + Activity 1 code)
- **positions 4-5** = Spaces
- **positions 6-10** = PIF code (always in **Caps Lock**) + spaces to make it 5 chars
- **positions 11-14** = industrial origin code - see transaction [ZPRI](#) - in case of tolling in an external plant, use the one of the Syensqo plant responsible for the tolling
 - 9997 for product bought outside the group from third parties
 - 9991 - 9994 for Rhodia GBU for which we do not know the specific industrial origin
- **position 15** = E (packed) or V (bulk) if a differentiation is made at that level.
- **positions 16-20** = free (not relevant for BFC)

Example

The name of the profit center F49JLAXXU1 is 349 JLA 3272E

- **Sector code** = 3 PLASTICS
- **Reporting Activity 1 code** = 49 FLUOR MATERIALS
- "empty"

- **PIF** code = **JLA** Tecnoflon
- Industrial origin code = **3272** SOLVAY SPOL US
- Packaging code = **E** Packed
- "empty"

3	Sector code
4 9	Activity 1 code
	"empty"
J L A	PIF code
3 2 7 2	Industrial origin code
E	Packaging code
	free

The long text of a reporting profit center used at **PIF** level (F)

- Description of the **PIF** from [table view ZZRT179V](#)
- Space - hyphen - space
- City name of the establishment (EMEA... for 9991 - 9994 - and "3RD PARTIES" for industrial origin 9997)
- Space - hyphen - space
- "PACK" or "PACKED" // "BULK"

Descriptions	
Profit Center	F49JLAXX01
Status	Inactive: Change
Analysis Period	01.01.2006 to 31.12.9999
Name	349 JLA 3272E
Long Text	Tecnoflon - W DEPTFORD - PACK

Note: If over the SAP 40-chars limit, abbreviate the names according to SLV traditions.

Activity 1 level

Example

The name of the profit center D3490 is **349**

- **Sector code** = **3** PLASTICS
- Reporting **Activity 1** code = **49** FLUOR MATERIALS
- "empty"
- not applicable
- "empty"

3	Sector code
4 9	Activity 1 code
	"empty"
	Industrial origin code
	"empty"
	free

The name of a reporting profit center used at **PIF** level (D)

- **position 1-3** = first 3 characters of the [Business Area](#) (**Sector code** + **Activity 1** code) - essential as used by COPA / BW for automatic determination
- **positions 4-10** = Spaces
- **positions 11-14** = Industrial origin code (only for specifics cheops value item like "ARRET")
- **position 15** = Spaces
- **positions 16-20** = Free (not relevant for BFC)

X	Sector code
X X	Activity 1 code
	"empty"
	Industrial origin code
	"empty"
	free

The long text of a reporting profit center used at **PIF** level (D)

- Description from table [ZZR_REPO_DIV](#) taking the middle 2 characters from the [Business Area](#) (ex. profit center D9TN0 - search for "TN").

Descriptions	
Profit Center	D9TN0
Status	Active
Analysis Period	01.01.2016 to 31.12.9999
Name	9TN
Long Text	TSNR - TECHNO SOLUTIONS UNALL

Company level

The name of a reporting profit center used at company level (E)

- **positions 1-4** = Reporting company code
- **positions 5** = Space
- **positions 6-20** = Company "Enterprise abbreviation" from transaction [ZPRI](#)
- **last 3 positions** = "hyphen"+"Country code" (from transaction [ZPRI](#))

Example

The name of the profit center E6288 is **6288 SFLX-DE**

- Reporting company code = **6288**
- "empty"
- Enterprise abbreviation = **SFLX**
- "Hyphen"
- County = **DE**

The long text of a reporting profit center used at company level (E)

- **positions 1-4** = Reporting company code
- **positions 5** = Space
- **positions 6-20** = Company "Enterprise medium name" from transaction [ZPRI](#)

Descriptions			
Profit Center	E6288	Status	Active  
Analysis Period	01.01.2016	to	31.12.9999
Name	6288 SFLX-DE		
Long Text	6288 SOLVAY FLUX		

Company and object level

The name of a reporting profit center used at Company and object level (S)

- **positions 1-4** = Object company code
- **positions 5** = Space
- **positions 6-20** = Company "Enterprise abbreviation" from transaction [ZPRI](#) in PRS
- **last 3 positions** = "hyphen"+"Country code" (from transaction [ZPRI](#))

Example

The name of the profit center SCHEF6329 is **6579 FIOP-BR**

- Object company code = **6579**
- "empty"
- Enterprise abbreviation = **FIOP**
- "Hyphen"
- County = **BR**

The long text of a reporting profit center used at Company and object level (S)

- **positions 1-13** = PARTICIPATION
- **position 14** = Space
- **position 15-18** = Object company code
- **positions 19** = Space
- **last positions** = Company "Enterprise medium name" from transaction [ZPRI](#)

Descriptions			
Profit Center	SCHEF6579	Status	Active  
Analysis Period	01.01.2017	to	31.12.9999
Name	6579 FIOP-BR		
Long Text	PARTICIPATION 6579 FIOPART PART SER COM		

Unlike reporting profit centers, the description of organizational profit center doesn't matter.

- **Short name** - company code + space + plant "establishment abbreviation" from [PF2 - ZPRI Display table ETAB](#) (using the first 3 chars of the plant)
- **Long text** - plant NAME1 from view V_T001W (if needed using standard SLV abbreviation for the site) + abbreviated NAME2 from V_T001W if making it clearer.

Department	X
Profit Ctr Group	CHEFCHEOPS

The only reporting profit centers impacted by the change of the Person Responsible field are the ones started by D* and F*

The field is not used but since it's a mandatory field put a X.
The field is not used

The field "Department" of the profit center is a critical field that is used in BW to assign a cost center to a plant and then to a site.

ex:

- The cost center 7512-1022 is assigned to the profit center 7512-10449
- The department of the profit center 7512-10449 is 7512

=> The cost center is assigned to the plant 7512

Depending on the type of profit center the department code can be:

- a plant code = a code maintained in table T001W in WP1 or PF1 (1)

K503 - Cost center

Rule by ERP + type of profit center

ERP	Type of profit center	Department	Example
PF1	Reporting profit center	= "blank"	General Data Profit Center: F3FQRAAX91 Controlling Area: CHEF Validity Period: 01.01.2016 To 31.12.9999 Basic Data Indicators Company Codes Address Communication History Descriptions Profit Center: F3FQRAAX91 Status: Active Analysis Period: 01.01.2016 to 31.12.9999 Name: 73F QRAA 9997E Long Text: NA25 FLAKES - THIRD PARTIES - PACKED Basic Data User Responsible: Person Respons.: X Department: Profit Ctr Group: D73F0 CH3F - Blanc Fixe

Organizational profit center

= plant code

By default the department code = profit center code without the letter C

However the rule is to have one department code by site even if for historical reasons there can be several profit centers in the same site.

ex: in Tavaux, all profit centers are assigned to the department TAU:

Profit center	Department
CTAH Slvr-Fr /Tavaux (Spc)	TAU Tavaux
CTAU Slvr-Fr /Tavaux (Pvdc)	

There is one exception when there are several management units / GBU in the site (only in GBU Soda Ash).

In the GBU Soda Ash, there should be one dedicated department for Soda Ash another one for Bicar.

ex: in Torrelavega

Profit center	Department
CTOS Slvq-Es /Torrelavega (Su)	TOSA (management unit Soda Ash)
CTOSA Slvq-Es /Torrelavega (Sod)	
CTOSB Slvq-Es /Torrelavega (Bir)	TOSB (management unit Bicar)

Profit Ctr Group	ZFR3-VZN01 CGUZN001 MISC NOV EUROPE CGU

Profit center used in the master data of SG&A / CBS / Financial cost centers (the codification of the cost center starts with the company code ★)

These profit centers are used in cost center that could be shared between several plants /sites.

Ex: in Rhodia Operation, there can be people working in the same team located in Paris or Lyon. Then the cost center is allocated neither to the Paris site nor to the Lyon site but to a generic site.

By default this rule applies to all cost centers that are not used on production plants.

The only exception is the facilities cost centers in CBS.

= generic GBU code

= BFC GBU code + 00

★ For historical reasons, there may be exceptions to the codification

i The code of the standard hierarchy in PF2 is KCHEF_HIER and it is structured in 2 main sub-groups:

- **CHEFCHEOPS** for reporting profit centers
- **CHEF_CNTRL** for non reporting Profit Center

GB = GBU code
 GAA = Group Activity 1 code
 S = Sector code
 AA = Activity code
 PPP = Plant code

KCHEF_HIER	HIERARCHIE DE CENTRES DE PROFIT
CHEF_CNTRL	Non Cheops Profit centers
Cxxx	Organizational profit centers
...	...
CHEFCHEOPS	
Exxxx	Reporting profit centers - Company code
...	...
BDGB	GBU name
BDGBGAA	GBU name - Group Activity 1 name
DSAAO	Activity 1 name
Dxxxx	Reporting profit centers - Activity 1
...	...
PPP	Plant name
Fxxxxxxxx	Reporting profit centers - PIF
...	...

i All profit centers must be attached to a node in the standard hierarchy
 In WP2, there is one standard hierarchy per Controlling Area. Its structure must follow the standard rule

i The profit center hierarchy can be displayed in SAP with:

- [KCH3 - Display profit center hierarchy](#)
- [WP2 - ZWFAI052 - Display profit centers](#)
- table ZWFAT186

i Value stream

The value stream (VS) is the lower level of the profit center hierarchy in WP1 system, where the profit centers are assigned through the "Profit Ctr Group".

Historically, the value stream nodes in the profit center hierarchy were used for some Industrial reporting on specific production lines but currently this reporting level is no longer used, unless there's a justified request for it. Nevertheless, we need to maintain the value stream node at a standard level.

Most of the value stream codes are already defined for a certain GBU and geographical zone and just need to be extended to a particular company code. It has to be always checked before creating a new code.

VALUE STREAM CODIFICATION in the profit center hierarchy:

X	X	X	X	-	V	Z	Y	M	N
---	---	---	---	---	---	---	---	---	---

XXXX - Stands for the company code

V - Standard for all the VS codes

ZY - Is used to define a specific GBU code as follows (the currently active GBU's are the ones highlighted):

•ZA for a VS under GBU ACETOW
•ZB for a VS under GBU PEROXIDES
•ZC for a VS under GBU COATIS
•ZD for a VS under GBU SODA ASH
•ZE for a VS under GBU ECO SERVICES
•ZF for a VS under GBU FIBRAS
•ZG for a VS under GBU ENG PLASTICS
•ZH for a VS under GBU SPECIAL CHEM
•ZI for a VS under GBU EMERGING BIOCHEMICALS
•ZJ for a VS under GBU TECHNOLOGY SOLUTIONS
•ZK for a VS under GBU COMPOSITES MATERIALS
•ZL for a VS under GBU SOLD ACTIVITIES (2003-2010)
•ZM for a VS under GBU SPECIALTY POLYMERS
•ZN for a VS under GBU NOVECARE
•ZO for a VS under GBU AROMA PERFORMANCE
•ZP for a VS under GBU POLYAMIDE & INTERMEDIATES
•ZQ for a VS under GBU Oil & Gas
•ZR for a VS under GBU CBS (former NON REPARTI RHODIA)
•ZS for a VS under GBU SILICA
•ZT for a VS under GBU RARE EARTH SYSTEMS
•ZY for a VS under GBU ENERGY

M - stands for the geographical zones, as follows:

EU: 0, 1, 2
NA: 3, 4
LA: 5, 6
AP: 7, 8
WW: 9

N - it's a serial number

Note: The value stream codes have to be included in table [ZWFAT187](#) to be able to define the related descriptions in several standard languages.

For this, the codification has to be converted to an 8 digit code as follows (some of the digits are already defined when establishing the VS node in the profit center hierarchy):

C	G	U	Z	Y	0	M	N
---	---	---	---	---	---	---	---

CGU - Standard for all the standard VS codes

ZY - Is used to define a specific GBU code, as per list above

0 - Always zero

M - stands for the geographical zones, as per list above

N - it's a serial number

Link to the old [WP2 Codification Value Streams Master \(OBSOLETE\)](#).

Consistency checks to be made before validating a “PIF level” profit center : if one of these conditions is not met, we need to challenge / reject the request

STEP 1

Check the consistency between the data present in the code, in the short name and in the long description

Descriptions			
Profit Center	F47ABFXKUS	Status	Active
Analysis Period	01.01.2008	to	31.12.9999
Name	747 ABF 1036E		
Long Text	BICAR FGD 5300 - 1036E HNM		

STEP 2

Check that the Reporting Division is within the validity dates in table **ZZR_REPO_DIV**

Display View "Reporting: Division": Overview					
Reporting: Division					
Div.	Division long name	Sub BU	Valid beg. date	Valid. end date	
45	VDC-PVDC	SFPOL	01.07.2002	31.12.9999	
46	PE COMPOUNDS	SFPOL	01.07.2008	31.12.9999

54	DO NOT USE - EX SU MANAGED BY BA/SR				
55	DO NOT USE - SU MANAGED BY PEROXI...				

STEP 3

In the table view **ZZRT179V** control that:

- The “ Flag PIF ” is ticked,
- The PIF is not deleted - The description of Product hierarchy can't contain *D*,
- The validity period - We cannot have profit centers at higher / lower levels of the hierarchy than the PIF

Display View "Product Hierarchies - Solvay Core": Overview										
Product hierarchy	Description	DDV	DFV	Flag PIF	Division	Name	DDV	DFV	DCT ans	
ABF	BICAR FGD 5300	12.06.2008	31.12.2099	X	41	BICAR FGD 5300	12.06.2008	31.12.2099	4203

STEP 4

Check the Business area assignment in the production plant is consistent with the Reporting division present in the profit center, in table view **V_134G** :

- Plant = plant code where the material is going to be extended. If it's a production

plant you can check its validity via transaction ZPRI,

- Product division = the one corresponding to the PIF, in table view ZZRT179V,
- The Business area indicated in view V_134G must be consistent with the Reporting division of the profit center.

Display View "Org. Unit: Business Area Determination": Overview

Org. Unit: Business Area Determination

View: V_134G
Client: 020

16.04.2018

PInt	Dv	Name	BusA	Business area
50QB	AI	BICAR FGD S300	7470	SODA ASH DERIVATIVES
50RB	AI	BICAR FGD S300	7470	SODA ASH DERIVATIVES
50SB	AI	BICAR FGD S300	7470	SODA ASH DERIVATIVES

50YB	AI	BICAR FGD S300	7470	SODA ASH DERIVATIVES
50ZB	AI	BICAR FGD S300	7470	SODA ASH DERIVATIVES
51AB	AI	BICAR FGD S300	7470	SODA ASH DERIVATIVES

STEP 5

Check that the other profit centers for the same PIF are linked to the same or other Reporting divisions.

Taking into account that they are exceptions, such as for PIF U* for utilities which can be assigned to several reporting divisions, as well as some product lines for which there are several Reporting divisions (e.g. chlorovinyls Russia <> Thailand <> Mercosur)

When a profit center becomes obsolete, we need to lock it :

- Set the "lock indicator" in "indicators" tab.
- Insert ZZ at the end of the short description.
- Insert ZZZZ at the beginning of the long description.

As the BFC Act1 or the plant is part of the code, we cannot change their meaning, retaining the code.

The only case where we can update profit center short description is when a production facility changes of "ETAB" code, still representing the same reality. This can occur usually in a Legal Entity Reduction or Carve Out project.

3.4. I create the profit center

STEP 1

Log is in English to start with the creation of the profit center in English.

Mandant

Utilisateur

Langue de travail

Start the transaction using the menu path or transaction code

 **KE51 - Create**

STEP 2

Start the creation of the new profit center

1. Enter the code of the new profit center
2. Use this field only if I want to use an existing Profit Center as a model.

Profit center	F49JLAXU1	1
Copy from		
Profit center	F49JPBXU1	2
CO area	CHEF	

STEP 3

Enter information gathered previously

1. Name
2. Long text
3. Person responsible
4. Department
5. Profit Center Group

The History tab is generated by the system to facilitate the identification of the user and the respective changes made by him in the master data of the Profit Center.

Once you finish you can use the check button  to control the creation

When the master data creation is completed and before saving, you must **ALWAYS** activate the Profit Center by clicking on the  icon

You will have a message validate:

New message , validate:

3.4.2. I replicate the newly created profit center into the other active controlling areas (only applicable in WP2 and EXCEPT for GBUs CBS and NBD):

In WP2, since we can not restrict the usage of the profit center to a certain controlling area, it is recommended that whenever creating a new profit center in a certain controlling area, it's also extended to the VPART nodes in the other active controlling areas (EXCEPT for GBUs CBS and NBD).

It's common that some intercompany processes occur between companies operating in different controlling areas, where the origin profit center is taken in the several subsequent steps in the other controlling area.

In order to avoid blocking this particular processes or generating assignments to dummy profit centers (Example: Z006-9999 in controlling area Z006), it's better to have all the profit centers available in all the active controlling areas.

You can find the VPART nodes in each profit center hierarchy at the bottom of the list:

Display Standard Hierarchy (Profit Center Group): Structure

Z006-Z0071	SP SPECIALTY POLYMERS - VPART
Z006-Z0078	TS TECHNOLOGY SOLUTIONS - VPART
Z006-Z9999	Enterprise - Miscellaneous profit center

There's only one VPART node per GBU. You should create the required VPART profit center by copy from the one created in the main controlling area and just change the related profit center group parameter, so it gets properly assigned to the VPART nodes and not in any other controlling area nodes.

For example, if we create a profit center in controlling area Z006, we need to create it in the other controlling areas (Z013, Z025, Z026 and Z028) inside the VPART node related to the GBU of the profit center created in CoA Z006.

Master Data of the VPART profit center

Name

Should be the "BFC GBU code + 00" + "hyphen" + "GBU descrip" (example "CM00 - Comp Mater")

Long Text

Should be the "BFC GBU code + 00" + "hyphen" + "GBU description" + "hyphen" + "VPART" (example "CM00 - Composite Materials - VPART")

Person Responsible

Should be the GBU name:

- Novacare
- Aroma
- Specialty Polymers
- Technology Solutions
- Composite Materials
- Oil & Gas

Department

If the profit center is created at company level:

- the original profit center and the related VPART profit centers have in the department the generic plant code created by GBU (example "CM00")

If the profit center is created at plant level:

- the original profit center and the related VPART profit centers have in the department the plant code (example "8347" - plant of company 7772)

Profit Center Group

Should be the last node of the VPART node related to the GBU (example: "Z028-VP079" - CGUVP079 CM Partners profit centers)

Example of profit center 8347-P1253 -> Profit center created in controlling area Z006 and extended to VPART nodes in other controlling areas:

3.4.3. I check that newly created profit center's IECRA and ENTRP codes are properly assigned in tables ZWFAT111 and ZWFAT113 (only applicable in WP2):

- In table [ZWFAT111](#), you should ensure that the IECRA code linked to the newly profit center created is properly assigned, ensuring that the link between the IECRA and the BFC activity 1 code/market is set accordingly for the related company code.
- In table [ZWFAT113](#), you should ensure that the ENTRP code linked to the IECRA of the newly profit center created is properly assigned, ensuring that the link between the ENTRP code and the GBU code is set accordingly for the related company code.

3.5. I communicate that a new profit center has been created

I notify the requester.
