T-code ZWFA88A variant 6268_POLAND.

Threshold is in local currency, which is PLN, but the corporate threshold is 250 000 EUR. This is why google exchange conversion is necessary every quarter to update the threshold before executing the report. Use google rate (just put in google "250000 eur to pln").

Report needs to be sent out to Tomasz Borowski for review and approval. Send the report on Day-5, **after that run the report every day** but send only if there is a tick on the left side of the report. If everything is ok then send the report **also on Day1**. Actual posting is done after all invoices are issued and sales period closed (customer period in OB52) issued and sales period closed (customer period in OB52).

- Choose T-code FBL5N (Customer) or FBL1N (Vendor). Choose some period (several months) with all items, find some invoice where PC or CC is mentioned and the same should be used for current or if you can not find - ask Tomasz Borowski to advise the correct profit center.
 - Profit center for vendor
 - IECRA for customer
- T-code - **ZWFAI052** - to see all profit centers for company (to check which profit center correspond to cost center and IECRA)

3.8.2. BW report upload in BFC

The reports have to be uploaded in BFC as csv file with add date (see screenshot)

The screenshot displays the SAP BFC interface for an actual report upload. The top header shows the report name 'ACTUAL2 - 2021.12 - 62683' and various status indicators. The 'Data Source' section is expanded, showing the following configuration:

- Source type: File
- File: 2021.08.62683 Working capital.csv
- Column separator: Comma
- Text identifier: None
- Start import at row: 2

A 'Data preview' button is visible below the configuration. Below this, a table shows the first four rows of the data being imported:

The last one ZZF_BFC_TRANSFER has to be requested by Robot instead of transaction.

However, before making the request it is necessary to upload BW and IFRS16 reports (check in emails from Vanda Costa about BOIC import and email from Anna Grande about IFRS16 upload) in BFC to avoid blocking controls that are solved by these reports. When it is done, go to <https://docs.google.com/forms/d/e/1FAIpQLScdBdxOoM38814bEg3chumCf7mpAAPa7jGOnWKXKiboWmzyzw/viewform?c=0&w=1>

And fill out the form as indicated below. BFC package should be closed while uploading.

Full execution is for the first time load, SAP vs BFC is used when changes are made.

Actual 3 - September and December closing

Actual 3 guidelines: <https://wiki.solvoy.com/pages/releaseview.action?spaceKey=CostOP&title=Actual3+Guidelines>

Responsibility of Accounting platform:

Create a file and fill these tabs according to instructions:

- L6864 –Net Financial Indebtedness
- L7110 – Transactions with Related Parties (Headings X5040, X5040, X5060)

and then send a file to a colleague (Ieva Driksna) to check and fill in other parts.

3.8.4. Solving blocking controls

1. When the list of blocking controls is available, take a screenshot and copy it to blocking controls file for the current year: https://drive.google.com/drive/folders/1_5s0vuH0cGxs2ZDz--M78o2liFGfsvEf
2. Compare with the previous months to check if any of them are repeated. If so, follow the previous path to solve the control.
3. If the control is new, check by description which items don't match and by how much, then go to indicated headings and see what needs to be corrected.
4. For each step take a snip and add to the file so that there would be a guide for the next months.
5. If there are tax controls (quarter close), let Tomasz (CAM) know when you are done with all the others so that he could correct those.

3.9. Closing Day 4
