

Co\$ta - Dashboard ARCHIVE

Co\$ta - Dashboard ARCHIVE

>> Back to the [Co\\$ta project](#) home page

General information:

Cost Transparency ARCHIVE aims to display Origin view data from Y-3 to current year (Y). Suggestion to mention 2019 as an example: If the current year is 2022, Cost Transparency ARCHIVE displays data starting from 2019. This way we avoid maintaining the documentation in 2023 when 2019 data should be deleted.

Highlight that Y-3 and Y-2 data is aggregated and some dimensions are not available. Examples: cost element, PO number, PO item and position for resp. Cctr among others.

In this dashboard you will find a single page: My report.

Authorisation:

The authorizations are the same as in the Co\$ta dashboard. If a user have access to the Macro Package People in the Co\$ta dashboard, he will also have access to it in the Co\$ta Archive dashboard.
