

Google Cloud Platform – Detailed audit logging mode

Google Cloud Platform – Detailed audit logging mode

Google Definition

When 'Detailed audit logging' mode is enforced, both the request and response are included in Cloud Audit Logs.

Changes to this feature may take up to 10 minutes to be reflected.

This org policy is highly encouraged in coordination with Bucket Lock when seeking compliances such as SEC rule 17a-4(f), CFTC rule 1.31 (c)-(d) and FINRA rule 4511(c).

This policy is currently only supported in Cloud Storage.

- [Cloud Storage](#)

In Solvay...

In order for a detail audit, 'Detailed audit logging' will be enforced.

There will not be any visible impact to the project.

The only impact is the slight increased to the cost incurred with the bill due to additional logging.
