Formats used in Solvay ONE

Module	Keepeek		Visual
	Content page	Master page	
Space banner image • The banner is responsive and it depends of the width of the screens (up to 1920px PC screen resolution) • Therefore it is recommended to provide the original image up to 1600px so that bigger screens will still see a banner that are not degraded • Meanwhile, on smaller screens, width of banner image will be adapted but the height will be fixed at 180px or 380px depending on page types • Note the recommended zone for the image details	1600*180px	1600*320px	1600 px 180 px / 320 px 
Banner Slideshow image	1060*303px	1060*303px	1060 px 303 px 
Editorial and Spotlight image/video	400*266px On 1,5 ratio	Not used	
Tile image • Has to be white and transparent	Not used	65*65px	

Rich text image/video - When contributor inserts an image in the rich text, a preview mode of the image/video is being called upon (corresponds to xlarge in Keepeek) - Contributor is free to set width and height of it's image/video - When Finish editing (publishing), image/video generated is based on whr in Keepeek, with the format (width and height) defined by contributor	width max at 900px	Not used	
--	--------------------------	-------------	--
