	Acceptance testing	07 Aug 2015
	Target release date	11 Aug 2015

Overview

- Apple pie release is a minor release to fix some bugs found in Solvay ONE since GOLIVE
-

Bug

- [ONE-261] - [Engage streams] In the JSON, some of the title are not parsed correctly, contains special characters
- [ONE-309] - [Design] Spotlight in central promotion not displaying correctly
- [ONE-387] - [XPM] - Insert external link on spotlights
- [ONE-402] - Page design broken while using a Keepeek image having a special char in its title
- [ONE-404] - Banner Slideshow in master page
- [ONE-406] - 'F' is not kept in weather tile
- [ONE-408] - Banner Slideshow in master page - when 3 banners, not showing correctly
- [ONE-409] - [Training] Publication is down with error 500
- [ONE-421] - [Tile] When no icon in picto, should display nothing in the picto area

Improvement

- [ONE-383] - [Image in rich text] - include blank space before & after image
- [ONE-416] - [Publishing] Automate publishing to all child publications in LIVE
- [ONE-420] - [One Search] Do not search contents in the homepage
