

Appspace (application administrator): naming convention for Chromebox

Context

When a new Chromebox is registered, a name must be defined.

Naming convention

The name is structured like this: <country code of the site><site code>-**CB**<chromebox number>

- <country code of the site>: country ISO code (2 digits)
- <site code>: Solvay site code (3 digits) based on this [list](#)
- <chromebox number>: sequential number (3 digits) based on column A of the [inventory](#)

Examples

- DEBBG-CB036
- ITLIV-CB068
- USPRI-CB101
