

Co\$ta - Responsible cost center FI or COPA

Co\$ta - Responsible cost center FI or COPA

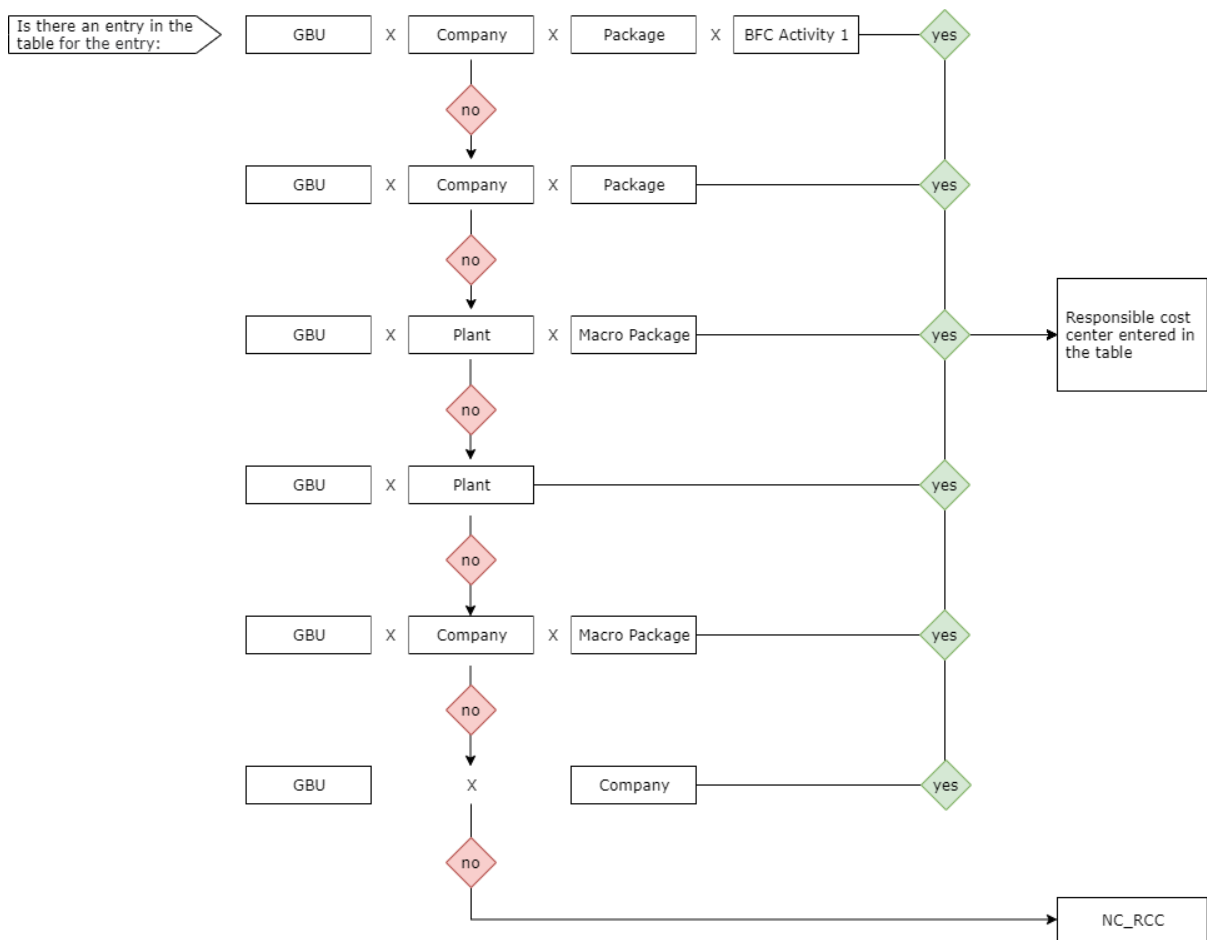

>> Back to the [Co\\$ta project](#) home page

When the [origin flow](#) is FI or COPA, there is no responsible cost center by default.

A table needs to be used to infer the Responsible cost center using the combination of the a GBU, a Macro package or a Package, a Company code and/or the plant code.

Different combination can be entered and the determination rule of the responsible cost center follows the following sequence:

STEP 1

Download the file [here](#) and update it with the list of combinations to be used for the determination of responsible cost centers (you can leave some fields blank):

GBU	Cost macro-package	Cost package	BFC Activity 1	Company code	Plant	Controlling area	Responsible cost center
-----	--------------------	--------------	----------------	--------------	-------	------------------	-------------------------

Enter the <i>BFC</i> <i>GBU code</i>	Enter a macro- package	Enter a package	Enter an Activity 1	Enter a company code	Enter a plant	Enter the controlling area corresponding to the company code	Enter the responsible cost center
ex: PE	ex: P00003	ex: P10012	ex: CSNR	ex: 0237	ex: CJEI	ex: CHEF	ex: X481200000
...							...

These rules are stored in DSO APCOCT15

STEP 2

Once the file is ready, follow the procedure [CoSta - Flat Files loading](#) to upload it in BW.
