

Rules - Internal Order - Responsible CCtr

The field **Responsible Cost Center** (1) might not be filled with the Cost Center that should receive the costs - this field is the **Settlement Cost Center** (2)

Instead the Responsible Cost Center (1) is linked to the person responsible to validate the respective costs.

The screenshot shows the SAP Settlement Rule configuration interface. The main form contains the following fields and values:

Order	C7512BATIMEN	Order type	ZORD	Follow-up of particular expendi...

User Responsible				
Requesting CCtr				
Requesting Co.Code				
Requesting order				
Location/Plant		/		
External order no.				

The 'Settlement Receiver' dropdown menu is open, showing the following options:

Order	C7512BATIMEN	BATIMENT C
Actual settlement		
Distribution rules		
Cat	Settlement Receiver	Receiver Short Text
CTR	7512-2022	← 2 Plant Administration

! Important information for the PM orders

The Responsible Cost Center is driven automatically from the Work Center mentioned in its master data. It can be manually updated in the PM order at the moment of the order creation; but to avoid potential errors it is important that the Work Center is updated properly to make sure that the field Responsible Cost Center is correctly added in the respective Work Center linked to that PM Order.
