

Manual entries Portal - Templates Management

Tasks to be completed when documenting an operation (from creation to publication)

1. Enter the **Title of the operation / page**

2. Add the following Labels:

- Scope of applicability: ww, country_accounting
- Country or group of countries (if applicable): belux, china, france, italy, lam, nam,uk_ie, bulgaria, dach, netherlands, iberia, poland, latvia, australia, india, japan, south_korea, thailand, singapore, new_zealand, emea_transversal, apac_transversal
- Unit and Domain according to the [List of labels to be used in the Finance Service Line space](#)
 - E.g. 1: WW Operation in Financial Accounting under domain "Central Finance Processes & Compliance":
 - Labels to be used: **ww, financial_accounting, central_fin_proc_compliance**
 - E.g. 2: France Operation in Financial Accounting:
 - Labels to be used: **country_accounting, france, financial_accounting**
(for country operations, the Domain is always country_accounting)

3. Fill in all fields as described above

4. Name the title of each section using OPD methodology naming convention - **Infinitive verb without the "to", mainly action verb...something) -" I do something..."**

5. Once the description of the operation is completed, ensure it is approved and published by launching the [GBS-Finance approval workflow](#)

Domain:  **WW**

<< Manual entries Portal - Templates Management >>

1. Objective and Scope

1.1. Objective of this Operation

Describe how the posting schemes templates will be defined and inserted in the Journal Entry Portal in SAP

1.2. Scope

WW

2. Definitions

See [Finance Glossary](#):

- JE Portal - Journal Entries Portal
- CAM - Company Accounting Manager
- FAC SU - Financial Accounting Service Unit
- ACP - Accounting Platform

3. Tasks description

The JE Portal tool in SAP is a tool to post manual entries directly in SAP without sending a request through the ticketing tool. To allow the users to post using the proper templates, we need to create them inside the tool with the correct rules:

- Posting scheme in accordance to IFRS, GAR and Accounting rules;
- Use as much as possible same templates for all companies;
- Accruals templates must always be created with the reversal date;
- Attention to Document type matrix to create the templates accordingly.

With the rules above in mind, please find in this documents how to create the templates.

NOTE: There are two standard templates for all company codes that needs to follow the rule described below:

- **MISC:** For all entries that is needed only one time in life.
 - Example:: Can be considered a correction, not PO related, a merge posting, one shot posting...
- **MISCPO:** For all entries done to correct a PO information.
 - Example: Wrong cost center in PO, wrong cost element in PO...

3.1. *I create a template inside Portal*

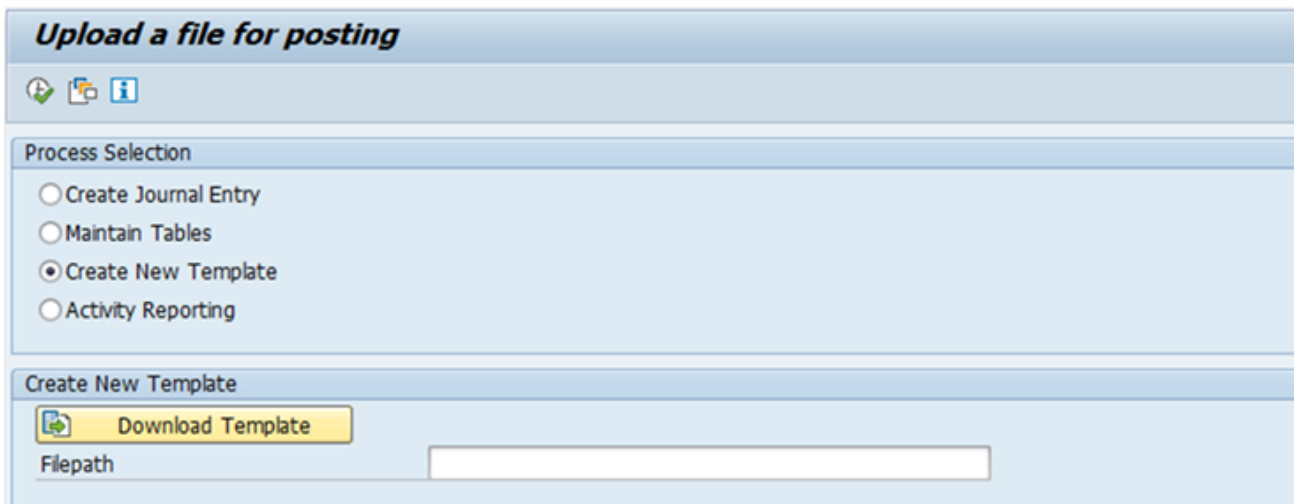

3.1.1. *I receive the e-mail from an user with approval to insert the template in the tool*

After receiving the complete information with approval, accounting platform must enter in the system the new template and also fill in the Library in google drive.

To create the template, please use the following steps:

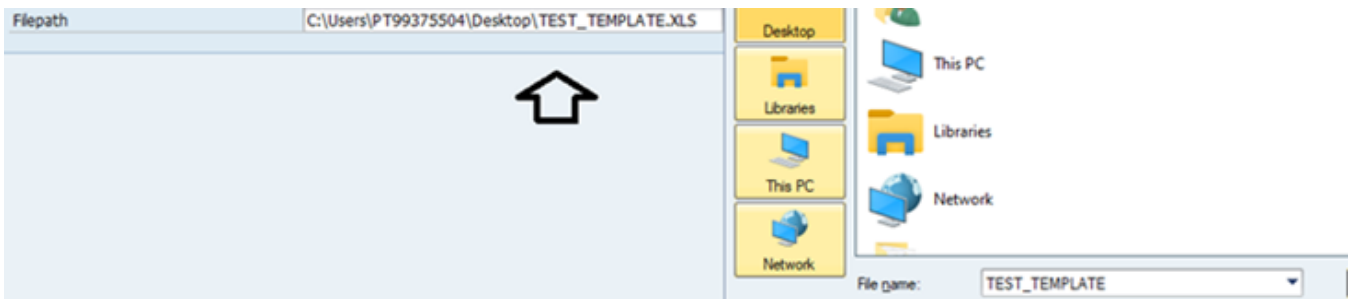

3.1.2. *I upload the template into SAP*

In transaction ZZP_POSTING_FILE, Select "Create New Template"

Use the "Download Template" option if you want to extract the excel file template.

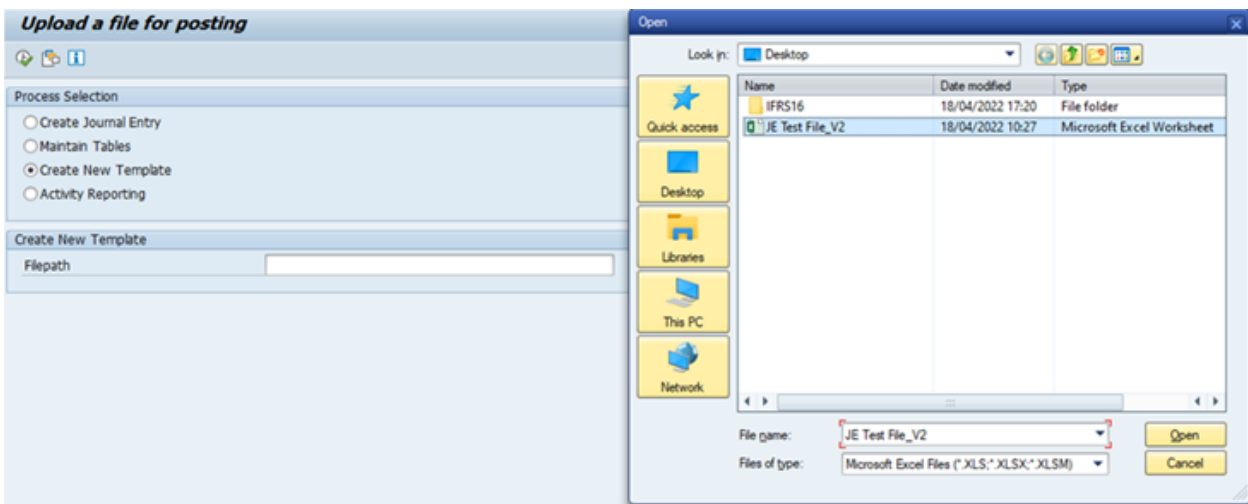

First choose the file path where you want to extract the template (local PC)

After press button

Use the field "Filepath" to enter the directory path and the file name of the file to upload. It is also possible to use the search help to open the Explorer and select the file to upload.

The file should be in Excel format and should follow the layout of the business process table (ZFI_BUS_PROCESS):

If the posting should consider the reverse option (Accrual process through FBS1), this option should be flagged, on the header item and in dedicated field:

Reversal option (Y/N)
X

Run the transaction to upload the template into the business process table (ZFI_BUS_PROCESS).
 To upload the information into the business process table the Excel file selected in the previous step must be closed. The following output layout will be presented:

Journal Entries Cockpit

Template Creation

Item	ID	Message Text	Template ID	L	Item	CoCd	T	Crcy	Exchange rate	Reference	Document Header Text	Ne	PK	S	G/L Account	Amount
		Table ZFI_BUS_PROCESS updated successfully.	IAS1	H	0001	S1	EUR			Reference	Header Text					0,00
		Table ZFI_BUS_PROCESS updated successfully.	IAS1	I	1	0001							50		4003000000	1.500,00
		Table ZFI_BUS_PROCESS updated successfully.	IAS1	I	2	0001							40		6350040000	1.500,00
		Table ZFI_BUS_PROCESS updated successfully.	IAS1	I	3	0001							50		4003000000	1.500,00
		Table ZFI_BUS_PROCESS updated successfully.	IAS1	I	4	0001							40		6350040000	1.500,00

Note: Please ensure the document type is aligned with Matrix.

[Use only manual doc types.](#)

3.2. I manage the templates

Fill in “Template ID” and “Company Code” and select the option “Table_1: Business Process”

Upload a file for posting

Process Selection

Create Journal Entry
 Maintain Tables
 Create New Template
 Activity Reporting

Maintain Table

Template ID:
 Company Code:
 Table_1: Business Process
 Table_2: Business Validations
 Table_3: Business Fields

In this table it is possible to change, delete and create new templates without using the upload file

Change View "Table for Business Process": Overview

New Entries      

TemplateID	Line Type	Itm	CoCd	PK	Special G/L ind	G/L Account	Amount
IAS1	H Header	0	0001				
IAS1	I Item	1	0001	50		4003000000	1.500,00
IAS1	I Item	2	0001	40		6350040000	1.500,00
IAS1	I Item	3	0001	50		4003000000	1.500,00
IAS1	I Item	4	0001	40		6350040000	1.500,00

- TemplateID should be a unique key
- One TemplateID will represent a FI Document so make sure it is accordingly (Header, Items, document balanced,...)
- If for some reason you prefer to edit an existing template in excel format and then upload it again, you need to delete all related previously from the table)

Maintain validations in Business Validation table

Fill in "Template ID" and "Company Code" and select the option "Table_2: Business Validations"

Upload a file for posting

Process Selection

Create Journal Entry

Maintain Tables

Create New Template

Activity Reporting

Maintain Table

Template ID

Company Code

Table_1: Business Process

Table_2: Business Validations

Table_3: Business Fields

In this table it is possible to create customized validations that will be applicable only in this cockpit when creating a Journal Entry based on a template:

Change View "Table for Business Validation": Overview

New Entries      

TemplateID	Line Type	Itm	CoCd	Field Name	Set Name
IAS1	I Item	1	0001	HKONT	Z_TEST_JE

The validations can be created by "Template ID"; "Line Type"; "Item Number"; "Company Code"; "Field Name". The available values to input should be included in the set indicated in the field "Set Name"

The sets to be used in these validations should be created using transaction GS01 and should be created for the fields to validate:

Display Set: Values

Basic set: Z_TEST_JE Z_TEST_JE

Table: BSEG Accounting Document Segment

Field name: HKONT General Ledger Account

No.	From value	To value	Short text of set line	FGr	Sym.Na...	SU	P/M	A
001	4000000000					<input type="checkbox"/>		
002	4000003210					<input type="checkbox"/>		
003	4000003211					<input type="checkbox"/>		
004	4000003212					<input type="checkbox"/>		
005	4000003213					<input type="checkbox"/>		

Maintain the fields that can be changed when creating a Journal Entry with a specific template in Business Fields table (ZFI_BUS_FIELDS):

Upload a file for posting

Process Selection

- Create Journal Entry
- Maintain Tables
- Create New Template
- Activity Reporting

Maintain Table

Template ID: IAS1

Company Code: 0001

- Table_1: Business Process
- Table_2: Business Validations
- Table_3: Business Fields

In this table it is possible to define for each template which fields can be changed when processing a Journal Entry:

Change View "Table for Business Fields": Overview

New Entries      

Table for Business Fields

TemplateID	Line Type	Itm	CoCd	Field Name
IAS1	I Item ▼	0	0001	WRBTR
IAS1	I Item ▼	1	0001	HKONT

The fields that can be changed when creating a Journal Entry with a specific template will be defined by "Template ID"; "Line Type"; "Item Number"; "Company Code"; "Field Name". When "Item Number" is filled in with 0 it means the rule will apply to all items in the template. For mass change in this table, you can use the macro attached to facilitate the process:

RPA Fields To be editable (3).xism

Apply always the technical field name for table maintenance:
