

DOT registration

Offerors and transporters of certain quantities and types of hazardous materials, including hazardous wastes, are required to file an annual registration statement with the U.S. Department of Transportation and to pay a fee (see Title 49 CFR Part 107, Subpart G (107.601 - 107.620)). This registration function is normally performed at the Zone level, and the registration can be for up to a 3 year period. Copies of available Registration certificates can be found in the resource section below. Please note that to be in compliance with DOT requirements, sites must retain both the registration certificate and the application supporting the certificate, which should be provided to the site by your GBU contact.

Below is the annual SYENSQO USA LLC US DOT HazMat certificate and the registration statement. Each site is required to retain both copies on site.

It is recommended that a copy of the certificate is posted in a prominent place at your location (eg: main bulletin board, warehouse, shipping office) and to keep both a copy of the certificate and the registration statement on file. Remember, inspectors will check to see if you have a copy of the certificate should they audit your site.
