

PiwikPro

 What's new?

Piwik PRO is a privacy-oriented alternative to Google Analytics. Created in 2013, Piwik PRO Analytics Suite allows for tracking web, app, product and intranet behavior of users. The vendor states their platform ensures compliance with strict EU, US, Chinese and Russian data protection laws, including the General Data Protection Regulation (GDPR) and the Health Insurance Portability and Accountability Act (HIPAA).

The platform includes customer care from implementation and onboarding, through product training, to analytics consulting and custom integrations – Piwik PRO provides a personal approach on every step of the user's journey.
