

Syensqo Cares

Syensqo Cares

The Syensqo Cares program is intended to guarantee minimum set of benefits globally to all employees.

INTRODUCTION TO SOLVAY CARES

Syensqo has decided to reinforce its commitment as a responsible employer by guaranteeing a minimum level of protection in terms of welfare and care for all its employees worldwide.

The minimum covers protection in relation to the following:

- Major healthcare costs
- Disability leave
- Maternity leave
- Paternity leave
- Adoption leave
- Employee Wellbeing Support
- Death of an employee.

As one of our key measures to strengthen gender equality, we have broadened our Syensqo Cares benefit program. We have adapted our global policy of 16 weeks maternity leave to 16 weeks, extending it to co-parents employed by the company regardless of gender, since 2021. The maternity / paternity or adoption leave period could be taken as one or several periods, according to the family needs and the job's constraints, in mutual agreement with the manager, while ensuring compliance with the local regulations.

Under the new agreement, we also commit to give employees access to confidential mental health support as from November 2021. By January 2023, when all rider contracts will be reviewed, global aligned standards of the Employee Well-being Support Program will apply and will then cover beyond the employee, also all members of the employee's household.

The global program guarantees the availability of individual services:

- i. First confidential contact with a psychologist via multiple modalities (phone, email, chat,...)
- ii. Five sessions (per distinct situation/issue) with a psychologist in local or preferred language (face-to-face or virtually)
- iii. Legal, financial, managerial and wellness orientation (relating for example to : nutrition, tobacco, mindfulness, parenting, ...).

Employees and household members can make use of the services for personal issues, family related issues, work related issues and also for practical support.
