

Imep

Details of the data used to calculate PCF from the IMEP database.

Last Update 6/22/2023 4:02:37 AM

Finished Product: **5,577**
 Production Year: **2021**
 GBU: **(All)**
 Finished Product: **(All)**
 Plant: **(All)**
 Index: **(All)**
 Origin Name: **(All)**
 Export Data

Production Year	GBU	Finished Product	Material Code	Plant	Index	Origin Name	Quantity	Unit
2021	NOVE CARE	ALKAMJLS S 275 LV 950 KG IBC	317964	ZFR3 Clamecy	1		-7,600.00	KG

2021	NOVE CARE	ALKAMJLS S275 E 950 KG IBC	316914	ZFR3 Clamecy	1		-142,565.00	KG

General description:

The purpose of this page is to access the data of the IMEP database for the query BW_QRY_MVCOPPO1_0021.

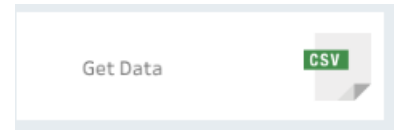

You can filter the data according to :

- GBU
- Production year
- Finished Product (By default Rheomer 33 200 KG DRUM)
- Plant
- [Index](#)
- Origin name

KPI:

- Finished product count : Total number of Finished Product we have in the data base according to the current filter selection.

Possibility to extract the data in a CSV/Excel/Gsheet file by clicking on the button "Get Data".

For more information, please have a look to [IMEP Documentation](#)
