

Sprint Retro 0

What went well (We nailed it)	What to improve on (Oops!)	Action Item
<p>Daily stand up meetings. Help to get on the same page with the team and bring up any blockers for the day.</p>	<p>Meeting invites get a little confusing between Gmail/Outlook - what meetings are moved/cancelled etc..</p>	<p>Navigating of Jira Backlog Board and Active Sprint Board a bit confusing.</p>
<p>The Sprint board helped me to not lose sight of my tasks and kept me more organized.</p>	<p>Just keep going!</p>	<p>Maybe (if all have available time), we can connect all the meetings that we have/had for today instead of having 30 or 1 hour in between them.</p>
<p>We all improved on how to manage tasks within Jira (Start subtasks, move tasks to in progress/complete)</p>	<p>Improve the ability to estimate story points for work.</p>	
<p>We learned better how the system worked, and fine tuned what the weekly meetings look like.</p>	<p>Improve management over what should be added to the backlog vs what should be worked on in the current sprint.</p>	
	<p>Workflow of newly added tasks/subtasks a bit confusing.</p>
