

How to access Google App Script

How to access Google App Script

1. Google App Script comes together with the following GSuite products (which is known as the container for Google App Script):
 - a. Google Sheets
 - b. Google Docs
 - c. Google Slides
 - d. Google Forms
2. You can easily access the Google App Script from these containers.
 - a. For Google Sheets:
 - i. From the Menu bar Tools Script editor

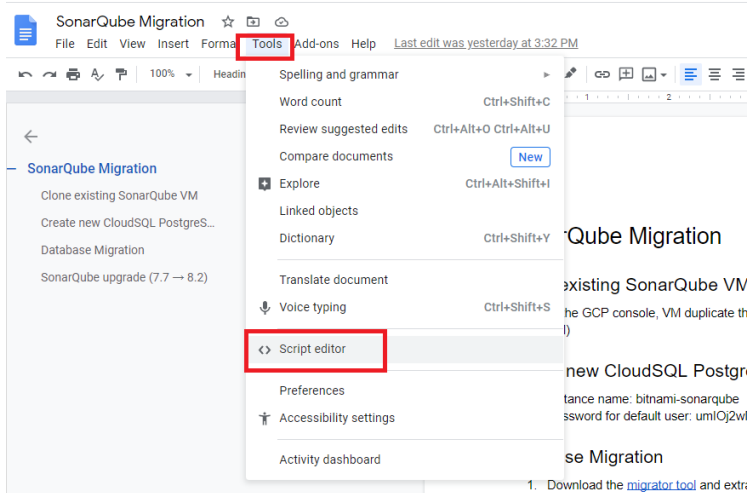

- ii. A new browser tab will be launched to script.google.com.

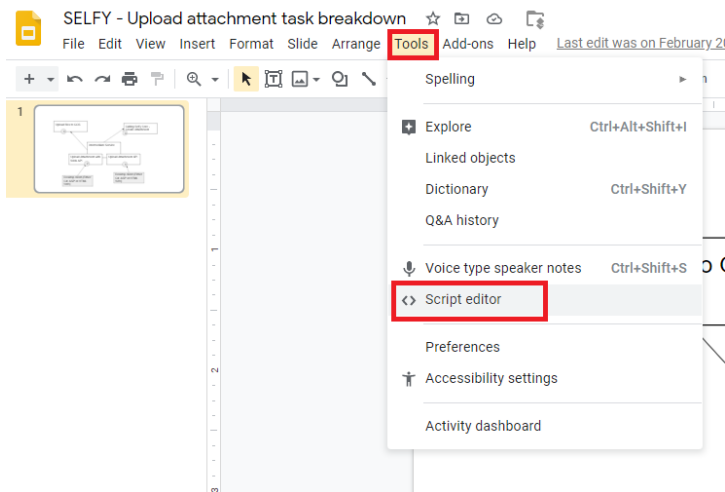

- b. For Google Docs:

i. From the Menu bar Tools Script editor

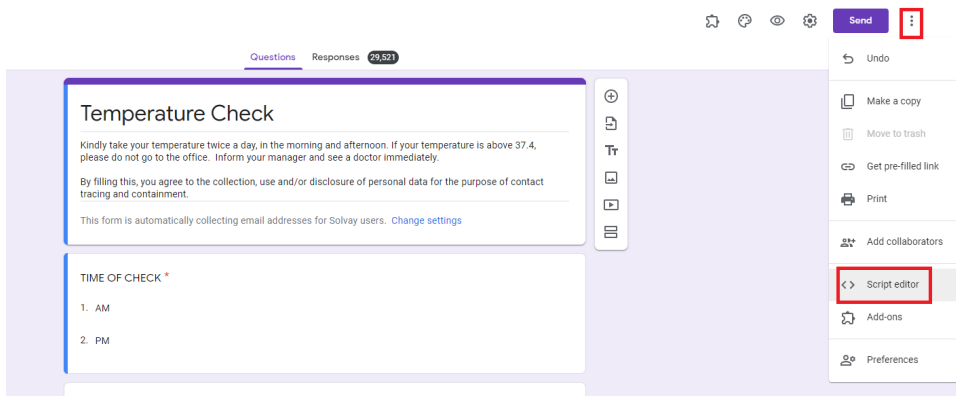

c. For Google Slides:

i. From the Menu bar Tools Script editor

d. For Google Forms:

i. From the "Kebab Menu" Script editor

Permission required for the containers

You will require at least "Editor" permission on the containers in order to have access to the Script editor (Google App Script).
