Societal Actions

MAKING THE DIFFERENCE THROUGH SOCIETAL ACTIONS

this Moment Matters

Our “creating sustainable shared value for all” aims at putting our expertise and energy at the service of our planet and society at large. What are the actions you have to impact the direct communities and environment? How can you engage with your team into action?

What to do as a leader

- The yearly Citizen Day is a flagship event, aiming at keeping the spirit high about corporate social responsibility and engaging in sustainability actions. Look at it as a moment of action that you can co-build and carry. Embrace team members' initiative to participate in the organization and activities related.
- What initiatives and networks are at hand to organize team building activities that will have a positive impact beyond the team? Share the accountability with your team members to make proposals and foresee time to act.

SYENSQO CITIZEN DAY

Biodiversity will be the theme of our next SYENSQO Citizen Day - which will be held in the second week of October 2021. Not only does the topic deserve attention, it's also a fantastic opportunity to ALL bond and do good for the world. As part of our SYENSQO One Planet program, our company is committed to reducing our pressure on biodiversity by 30%. Each of us can also contribute personally, in all of our sites and communities.
