

Use Case Video - Training Material

Here are some helpful videos that explain the basic use cases of Shiftconnector.

Eschbach has created their own youtube channel with short videos explaining some different use cases: [Youtube eschbach Academy Training Channel](#).

Here is a list of some of the interesting videos:

- [How to create and use events on a daily basis](#)
- [How to create and use tasks on a daily basis](#)
- [How to create instructions and work with them](#)
- [The difference between events, tasks and instructions](#)
- [How to do a shifthandover with shiftconnector](#)
- [Smart Search](#)
- [How to track attendance in shiftconnector](#)
- [How to configure the attendance functionality in shiftconnector](#)

Also some in house videos were created before the Youtube eschbach Academy Training Channel existed, you can find them here:

[Basic Use Case - Shiftconnector \(explaining events/tasks/instructions\)](#)
