

LB DataLab One Search - Template Tickets

Introduction

One Search feature aims to be adaptable to the majority of the markets with common design and functionalities. Thus, in order to speed up ticket creation, **template tickets** were created.

These tickets are grouped in EPIC:

 Unable to locate Jira server for this macro. It may be due to Application Link configuration.

In order to avoid having them all in DataLab Design board, the template tickets are put in TO DO status.

In order to use them:

1. Clone the tickets
2. Reassign them to the appropriate EPIC
3. Modify the parts that are in **underlined bold red**.
4. Add mock-ups, designs if need be.
