<h2>Framework</h2>	
Back ground	<p>Star Factory has defined 42 sites in the 2023 roadmap to initiate the implementation of the digital solutions. The deployment will be divided per wave. <u>This project is to cover wave 1 (14 sites).</u></p> <p>To support Star Factory ambition, local IT infrastructure bricks must be upgraded to ensure reliable connectivity, applications' performance and delivery of new industrial capabilities.</p> <p>The following domains require major upgrades</p> <ul style="list-style-type: none"> Connectivity: <ul style="list-style-type: none"> Site connectivity Internet connectivity Workplace: <ul style="list-style-type: none"> Replacement of end-users devices New meeting rooms IT for industrial: <ul style="list-style-type: none"> IoT 4G/5G
Vision & Objectives	<p>This initiative is proposed to support Star Factory reach their goal for digital/connected factories providing the IT infrastructure required for Digital maturity , to promote digital transformation, to foster innovation, to improve performance and to increase security.</p> <p>The benefits expected are: More reliable/supported network equipment, connectivity improvement ; new digital capabilities (use of IOT) ; better experience in meeting rooms, user satisfaction improvement regarding IT services, productivity improvement (less disconnection with increase of internet speed) ; guarantee infrastructure scalability and security, ensure service continuity in the event of network failure, wireless plant coverage extension (wifi, 4G/5G-public)</p>
