### SECTION 1 - Main principles

---

SRM7 is the Digital & technology solution used by approx 3,500 users across the world to request their needs, to access to e-catalogue, approve the request (techn. + purch. + fin.) and to declare delivery receipt

It is part of a global Purchasing process involving GBS, Purchasing and GBU organizations

Depending on where the order is placed, the rules are different.

There are 3 cases:

**CASE 1 - the order is placed on a cost center**

- The person responsible of the cost center can approve the purchase order up to his [approval limit](#).
- The position of the person responsible is maintained in the [Cost Center - Master Data](#)

**CASE 2 - the order is placed on an order**

- It is the person responsible of the [responsible cost center](#) of the order who can approve the purchase order up to his [approval limit](#).

**CASE 3 - the order is placed on a WBS**

- By default it is the person responsible of the [responsible cost center](#) of the WBS who can approve the purchase order up to his [approval limit](#).
- However it is possible to force the person responsible of a WBS using the field "Person Respons."

### SECTION 2 - Financial matrix

---

The financial matrix is stored in the tool SRM. It is a multi-level organisation chart. Each level of the matrix is a position (not a name).

You can extract the financial matrix using procedure [SRM7 financial matrix](#)

When creating a request to update the SRM7 structure, the best way is to provide the Financial structure file with the intended modifications.

The file contains every information needed to make the creation, modification or removal in the structure. By indicating on the file the necessary information, the SRM7 team should be able to make the changes more quickly without back and forth.

## SECTION 6 - Impact of the project PO2

---

In the frame of Po2, the financial matrix was duplicated. There is one financial matrix for SCO and one for ECO

=> All cost objects in a company SCO should have a responsible SCO and vice et versa.
