PO2 - BW - Impact on reports

PO2 - Impact on BW reports

[2 major changes in BW] [Overview of changes] [1. New authorization scopes] [2. New consolidation views] [Frequently asked questions]

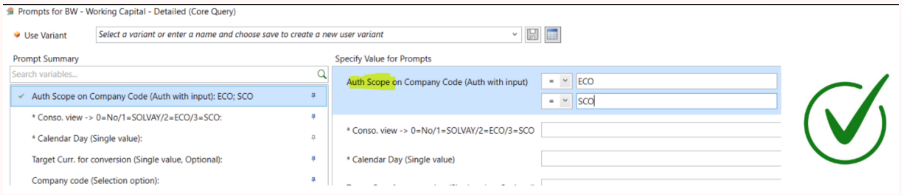
2 major changes in BW

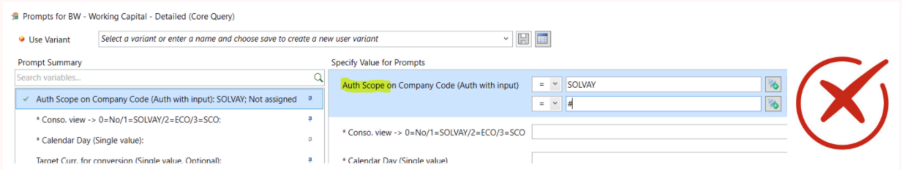
In the frame of the project PO2, there was 2 major changes on BW reports

1. New **authorization scopes** replaced the authorization scope SOLVAY:
   - ECO to be used by SOLVAY users
   - SCO to be used by SYENSQO users
2. New **consolidation views** are available.
   - 2 - ECO - New consolidation view for SOLVAY companies
   - 3 - SCO - New consolidation view for SYENSQO companies

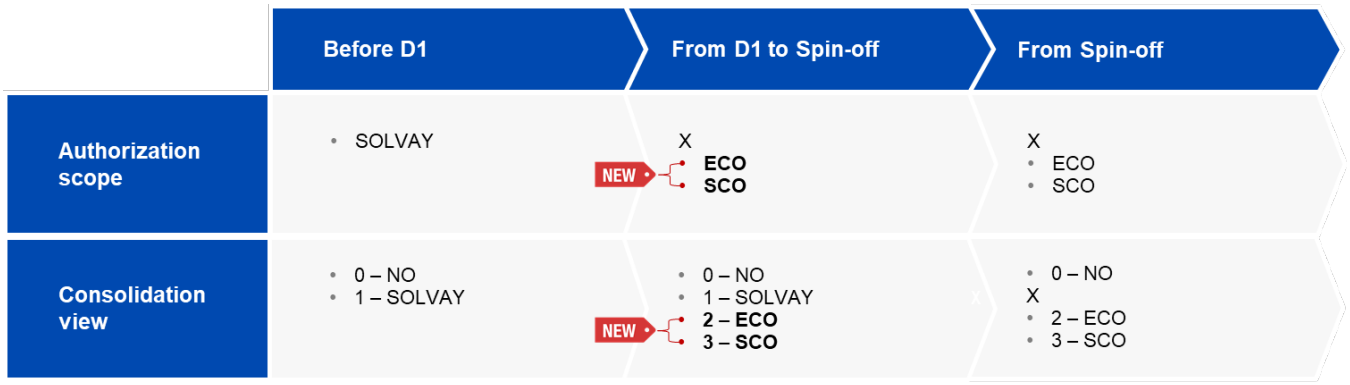
=> The consolidation view 1=SOLVAY can not be used anymore

In the query prompt, **Authorization Scopes** SOLVAY and # **MUST NOT BE USED ANYMORE,** instead you should only use ECO and/or SCO **.** This general rule is not applicable to EHS application users.





Overview of changes



1. New authorization scopes

PO2 - BW - Authorization scopes

The Authorization scope (technical name = C_AUTHMA) is a field that is used in BW to segregate authorization depending on the user profile.
Until D1, all Solvay users have by default access to all company codes SOLVAY.

From D1, ECO users will only have access to the data of the legal entities ECO, and SCO users to the legal entities SCO.

Only users working for the TSA will have access to the data of the legal entities ECO and SCO.

Detailed explanations

PO2 - BW - Authorization scopes

2. New consolidation views

PO2 - BW - Consolidation views

In some BW reports, it is possible to display the data with the legal view or the consolidation view.

- Until D1, there is a single consolidation view : 1=SOLVAY
- From D1, there will be 2 new consolidation views : 2 = ECO & 3 = SCO

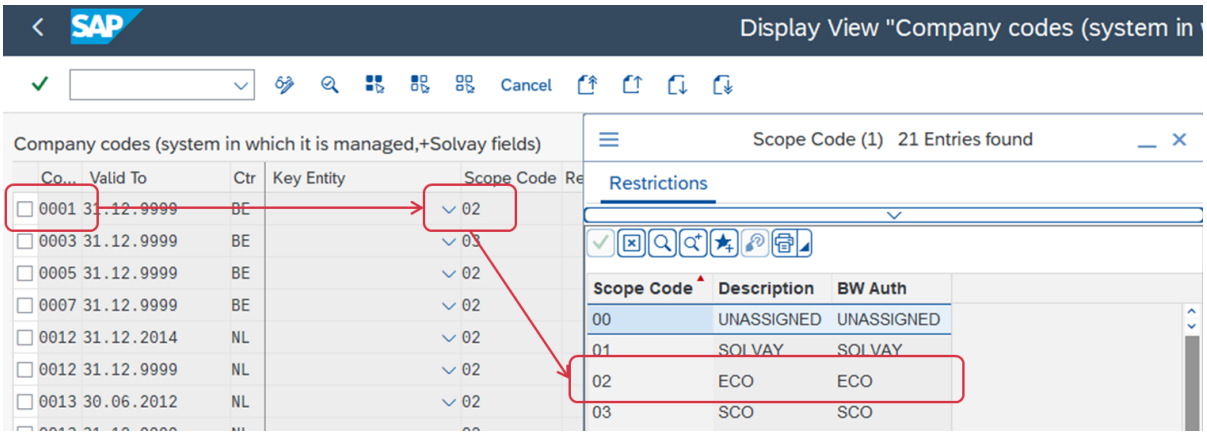
Detailed explanations

PO2 - BW - Consolidation views

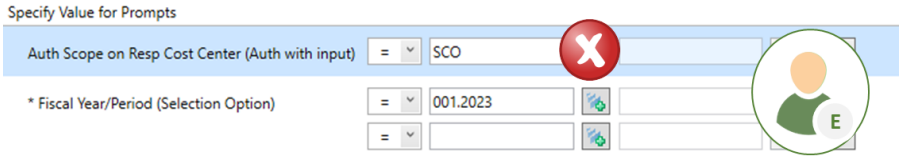
Frequently asked questions

A company is allocated to an authorization scope with the table Table ZZF_T001_MGT_V - Company codes

ex. the company 0001 is assigned to the scope 02 - ECO



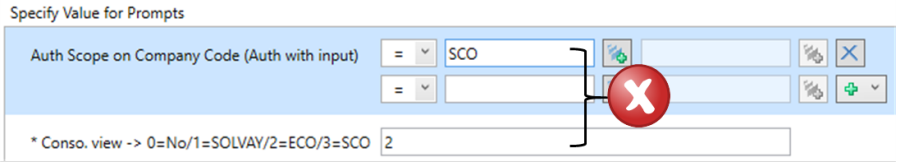
1. Check the authorization scope in the prompt. If you are working for a GBU ECO, you must enter the authorization scope = ECO.



2. Check that you do not enter inconsistent data in the prompt. For instance:

   - You can not enter a company ECO (ex: ZFR3) if your authorization scope is SCO.

   - You can not enter the consolidation view 2 - ECO and the authorization scope SCO



3. Specific cases: Working capital & Credit management

   - The option conso view = 0 doesn't work. If you need a non consolidated view of the working capital, you need to use the dedicated query "*WC Accounting (not conso) view*"

4. Once you've done all these checks and if it still doesn't work, you can create a ticket in service one.
Please follow this process if you need to open a ticket for Hypercare:

1- Report an IT issue on Service One

2- Select the issue type "Hypercare"

3- Select the project Po2_*Data*_Analytics

4- For the Subject, please write "BW authorization"

5- Then, add a title + description with details about:

> What query was executed

> What selection criteria was used

> Keep in mind that you can only use ECO and SCO in the prompt. SOLVAY and # will not work anymore

I wish to report (required)

For more information, please refer to the description above.

An Hypercare Issue

Project (required)

Please select the project on which you wish to report an issue.

PO2_Data_Analytics

Subject (required)

Please provide a short description of your issue.

BW Authorization

Description (required)

Please enter a full description of your issue, including attachments that may help us to investigate your issue.
If you do not work normal office hours (shift work), please share with us the days and times you will be available in the coming week.

Urgency (required)

I can still do my work.
