How to create/modify a template?

Why it's useful to create template?

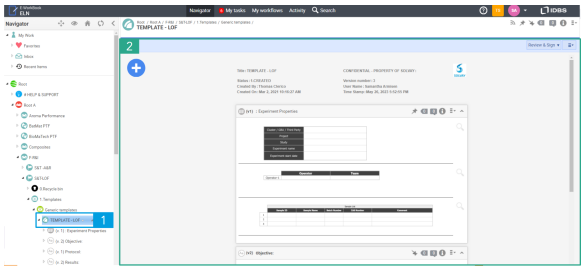
Create a template in ELN allows you to save time when you often run the same test with a particular protocol/equipment.

Who can create templates?

ALL key users can create and modify a template.

How to create/modify a template?

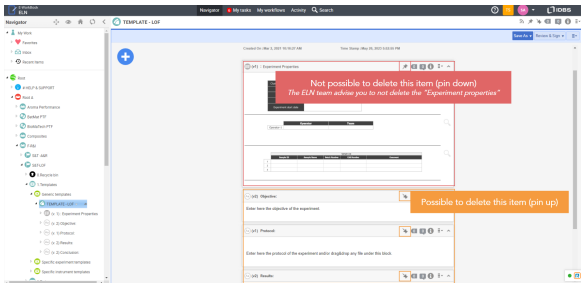
1. Select a template in your hierarchy.



2. Open and modify as an ELN experience:

- Click on "**+**" to add a new item: free text (e.g. procedure), Excel with predefined table, picture of the set up…
- Change items order
- Save as a version

You can create as many templates as you like!

3. Just one difference with an experiment:


you can select if the user can delete the item (pin up) or not (pin down)
