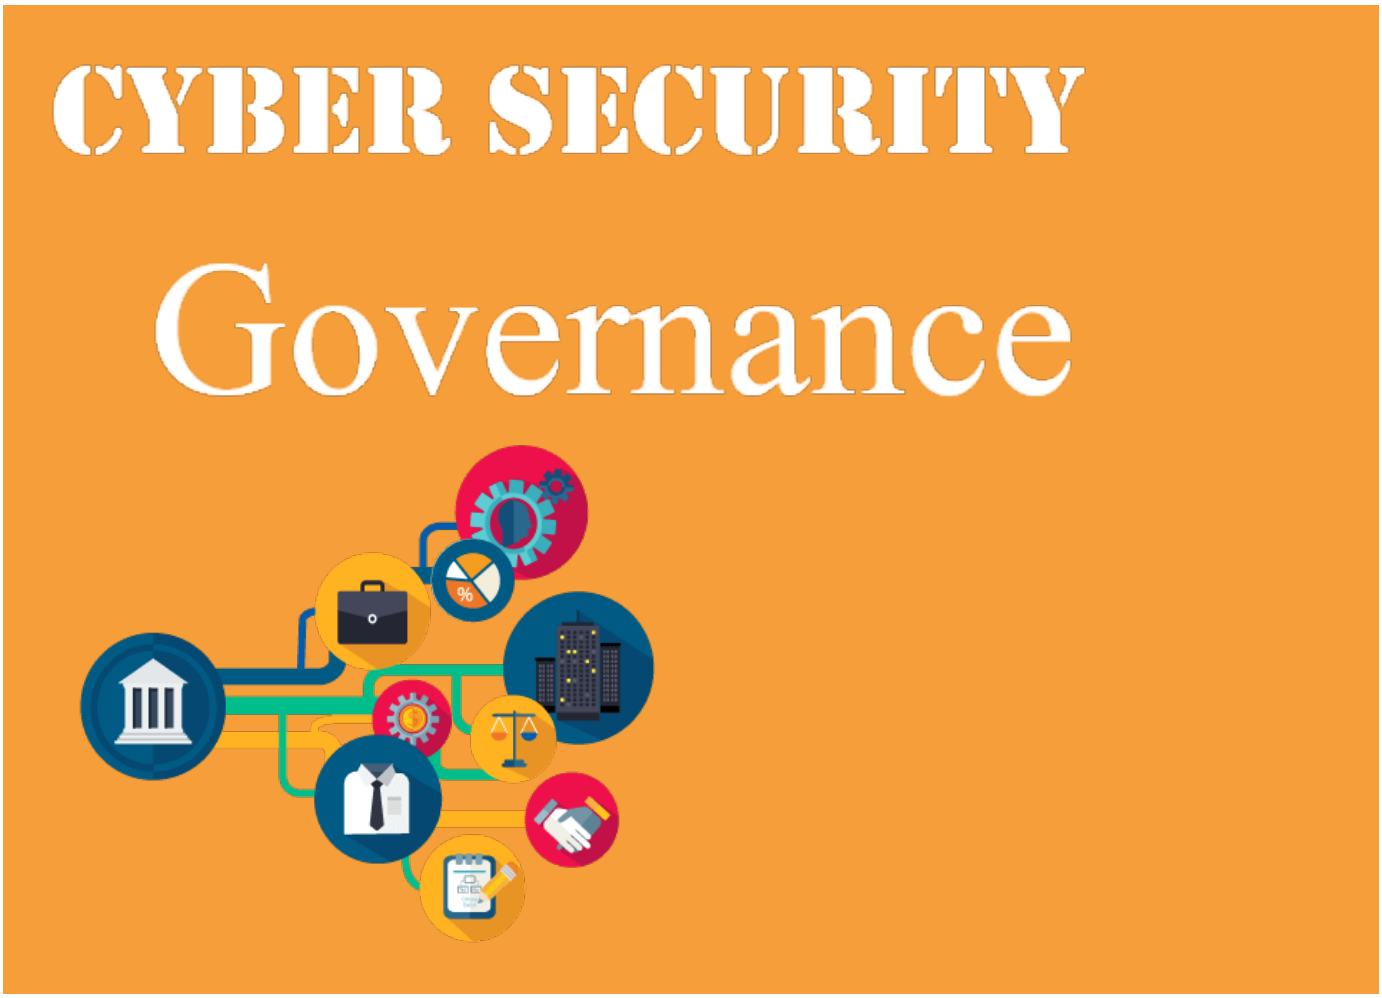
Governance



Governance

Institutionalize Cyber Security throughout the organization through the establishment of a strong governance program.

Adopt a risk based approach to identify required policies and standards. Ensure security procedures are established and operational.

Establish governance to maintain internal and external security requirements. External requirements could include mandatory regulations or desired certifications. Internal requirements includes alignment with approved policies and standards and other internal factors including Syensqo's cyber maturity objective.

Creation of a security-by-design/ security-first environment for all stakeholders. Security education, training, and awareness will promote the desired security culture and behavior for the organization.

Implementing security solutions is a monetary and resource investment for the organization. It's essential to be able to measure and report on security performance and maturity levels.
