Jobs and Positions at Syensqo

INTRODUCTION

At Syensqo Positions are maintained by the Managers, who ensure the correct and timely update of the Position data for their teams.

Positions are created based on generic Jobs. As of February 2022, following a significant simplification of the [Job Catalog](#), the Jobs represent a Domain of activity inside a Function.

In case you have doubts regarding the correctness of your position data, please check with your Manager, who is accountable for position data accuracy.
