

Payroll Google Calendar

Payroll Google Calendar

Payroll now has an Online Calendar

INTRODUCTION

We know it is never easy to memorize dates so it's with great pleasure that we announce the creation of a **Payroll Calendar for your country!**

The purpose of this Google Calendar is to allow all employees in the country to consult the most relevant Payroll dates.

With this calendar you will be able to identify the last day to record data in your HR tools, to remember the day of your salary payment and more. But this calendar also comes in handy for more specific populations, like Finance to capture the Posting file dates.

So... How do you add this calendar to your google calendar list?

At the launch of each Payroll Country Calendar you will receive an email, inviting you to add your country's calendar (including newcomers, as each calendar will be linked to all employees locally). If for any reason you didn't receive this email or wish to add another country calendar, you will find below a list of Payroll Calendars per country. Just select the one you want to see and that's it!

There are calendars for more countries being worked on.

Note: All events are created based on a full-day event. This means that we need to consider the country's time zone. Example: If a payslip is delivered on the 23rd of December in Canada, on a Portugal view this will cover two days because of the different time zone).
