

Unable to Edit even I have Editor permission

Prerequisite

- Your account is already defined as Editor for the space.
- If the page has restricted editing, make sure your account is within the list to edit the page.

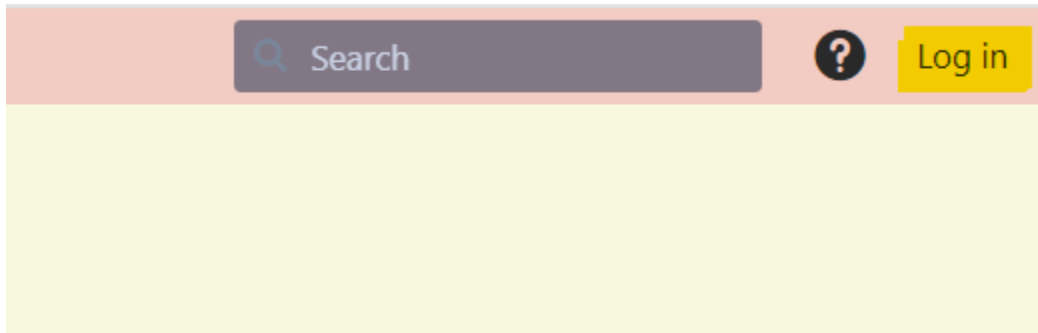

After the Spin-off, when you first visit the Confluence Wiki's space, by default you are accessing it without editor permission.

You need to login to Confluence Wiki in order to elevate your permission as editor.

To access your space with Editor permission

1. Access this link <https://wiki.syensqo.com/plugins/servlet/samlssso>

Or access <https://wiki.syensqo.com/> and click on the login button which is present at the top right side

2. After you have successfully logged in, go to the space that you wanted to access.

You will see the edit option on the page.
