

FD - [CORE] Grace Period

Grace Period is defined on the Utility object and record type : One Quote Grace Period

It can be found on the filter name : Grace Period.

Only Users with the Permission set : "Data Manager" can creat or edit these records.

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

At Quote Creation (from Account, Scratch, Cloning , reneweing) a Grace period record is defined based on the One Quote GBU, BU, Region , Account Customer Segment.

It prefill the value Quote Valid to to the "Default External Validity"

It prefill the value Quote Valid From to the "Price Valid to Internal"

A validation rule prevent users to set a Quote valid to and from when the number of days inbetween is above the "Max External Validity"
