

BUSINESS WAREHOUSE

[Request Access](#)

Introduction

Business Warehouse (BW) is the SAP tool to extract reports with data coming from the transactional systems (mainly WP1 & PF1). Users can use Analysis, an excel add-in, to connect to BW and then select a report to launch. The result of the report will directly be displayed in Excel.

High level of BW data flow

Also BW is the main database to send data to other platforms like Qlik, Salesforce, SAC (Sap Analytic Cloud) GCP (Google Cloud Platform), Tableau by data engineering tool such as Talend or MFT (Manage File Transfer) tool.

BW Reports are organized by *Applications (represented as 'Roles' in the Analysis)* corresponding to functional areas. Each user is given access to one or more Applications based on needs.

Getting BW installed

Requesting Installation

You cannot install SAP Business Intelligence by yourself.

To get BW installed on your PC you need to request it from your local [Service One](#).

1. Choose the service [Software Installation Request \[Workstation\]](#)
2. Software Requested: SAPGUI (SAP Logon & SAP Business Client)

Checking the Installation

[blocked URL](#)

[blocked URL](#)

To use BW you need to have the "Analysis for Microsoft Excel" tool installed.

To check the installation :

1. Select "START" button
2. Open the "SAP Business Intelligence" folder
3. Double Click "Analysis for Microsoft Excel"
4. Verify that you have the "Analysis" Ribbon in the top bar

If you do not find the "SAP Business Intelligence" folder, you need to request it from your local [Service One](#) and request them to install Analysis for Microsoft Excel.

Getting a BW Account

To get a new BW account (or to modify/delete your existing account), the requester fills the [BW online form](#) in Service One:

1. Choose the service [SAP Access Request](#)
2. Select the Type of request: creation or modification
3. Select the environment: Production (WBP), Pré-Production (WBV), Quality (WBQ)
4. Select the SAP system: WBP - BW Business Warehouse
5. Select the Business Roles you need

Authorization team will ask for validation from some key contacts. This take several days due to required approvals (Based on the applications and perimeter the L1 AM team will request several approvals).

Once accesses are validated, L1 AM team will create the account and inform the User by email.
