## Data Force Team

### Team mission

We, data-focused catalysts, **digitize R&I labs** and build a *secured, standardized, and centralized R&I Data Ocean* with intuitive solutions to empower researchers with **historical** and **optimized data**, aiming for a full adoption rate that generates a *15% lab productivity improvement, 10% non-duplicated lab experiments*, and boosts the time to market by 5%.

### Data Force Team Jira Boards ([Design](#) & [Dev](#)): R&I Domain Data Ocean Backlog/Product

These boards are meant to track the development of the data ingestion from the multiple data entries to the R&I domain data ocean in GCP.

### Team Members

## Nexora Team

### Team mission

SyDatalab pioneers of the future of the web application for R&I data analysis by developing an intuitive, configurable, and customizable plug-and-play application. This tool allows R&I researchers to consult, search, and analyze data generated by Syensqo R&I labs, enhancing team collaboration, accelerating time to market, and reducing customer response times and experiment duplication. The web app streamlines lab data analysis, enhancing researchers' insights, efficiency, and innovation aiming for a full adoption rate that generates a *15% lab productivity improvement*, *10% non-duplicated lab experiments*, and boosts the time to market by 5%.

### Nexora Team Jira Boards ([Design](#) & [Dev](#)): SyDatalab Backlog/Product

These boards are meant to track the development of the visualization of the data coming from the R&I domain data ocean in GCP for Syensqo R&I Labs.

## L<sup>2</sup> Team

### Team mission

Labwareizators: Our mission is to empower test requestors and lab analysts to effectively receive and conduct analytical tests requests by enhancing the efficiency, automation and user-friendliness of Labware, enabling seamless management of samples and tests. We aim to streamline and optimize data collection and management for laboratory experiments, to ensure data confidentiality, assisting R&I workers in capturing and sharing analytical test data.

## The L<sup>2</sup> Team Jira Board: LIMS Labware Backlog/Product

This board is meant to track the development of the data ingestion through the LIMS Labware application.
