

My Data Report

Back to [Pricing Dashboard User Documentation - Main Page](#)

[blocked URL](#)

My Data Report is the module of the pricing dashboard where it is possible to display and download the raw data tables you need for your analyses in an Excel/Spreadsheet format.

Data accessibility is linked to the [visibility model](#), if your profile does not allow to see costs/ICM data, you will not see all the information of this page!

My Data Report Navigation

There are several data set available in my data report

- Sales Report
- Margin Waterfall
- Sales Chart
- Campaign report
- Currency Exchange Rate

All reports can be saved using the bookmark function (see "[How to create a bookmark](#)")

My Data Report Information

Find all the [dimensions](#) and [measures](#) available in my data report.

How to download data?

1. Right-click the table in My Data Report you want to download data from.
2. Select [blocked URL](#) Download as... and Export data.
3. Click the link to download the data file.
4. Open or save the file.

The default maximum number of rows and columns in the Excel export file is:

- 1048566 rows per sheet. For pivot tables: 1048566 column dimensions. 10 rows can be added after the export.
- 16384 columns per sheet. If the number of columns exceeds the limit, the exported file is truncated and a warning message is sent.

How to use the currency fx rate?

To note: Sales in DC are the real values (ie match BW). Sales in LC are converted from DC with a daily FX rate. Sales in EUR are converted from LC with a monthly rate. See example below-

Local currency	Hypothetical Sales in LC	Conversion to EUR	Sales in Eur
USD	1000000	0.90455989	1105509.996
