

SAP GRC Access Control

Introduction

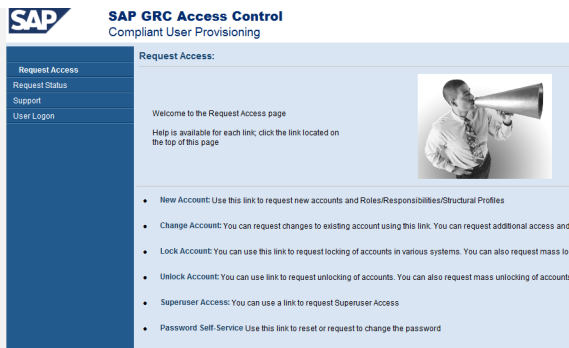

SAP GRC Access Control is the tool used for:

- Compliant User Provisioning (CUP)
- Risk Analysis & Risk Mitigation (RAR)
- Superuser Privilege Management (SPM)

Compliant User Provisioning (CUP) provides compliant user provisioning across enterprise systems.

Included are access request self-service, approvals, compliance checks, proactive resolution of access controls, and provisioning.

- [Request for an ERP account](#)
- [Password Self-Service \(Obsolete\)](#)
- [Terminating of PF1 users from Solvay Legacy](#)

Getting Started

SAP GRC CUP is used **via a web navigator like Internet Explorer**. To access the GRC CUP, please use the link below.
