

Discover Managing Innovation Projects (MIP)

You are belonging to a Innovation project or you are interested by being a team member or a project leader....

Just begin this exercise, not linked to SYENSQO:

think about personal examples: house renovation, family trip, party organization, etc.

What kind of uncertainties
did you have to deal with?

I like taking the example of a trip in a desert (cold of hot) such as Antartica...🌐

You need to think about:

- the period of the year - because you could have only NIGHT LIGHT. How will you manage the cold ? How to manage meeting a bear ?
- What about the travel? I can imagine there is no direct flight from your city 😊
- Why going to Antartica ? for pictures report ? for scientific reasons ?
- You need to manage your budget
