

WEGO

What is WEGO?

WEGO is Syensqo's process for developing, managing, & visualizing the portfolio of Innovation projects... see the [link to General Wego Presentation: process and tool](#)

- Relating to new products, processes, and applications
- Targeting growth, competitiveness, and defense of current business
- Spanning incremental changes to breakthrough transformations
- From idea selection to commercialization & post-launch
- A tool to efficiently manage multi-functional project deliverables and support **phase-gate project management**
- **Gate Presentations** allow vetting of deliverable completion in project decision making.
- **Dashboards and reports** allow quick extraction and visualization of project and portfolio data for internal and external reporting

Involving cross-functional teams, e.g. R&I, Marketing, Industrial,... WEGO has been in place since 2015 for all GBUs & Corp R&I and for Specialty Polymers since 2010.
