

European Works Council

European Works Council

come to the European Works Council.

European Works Councils were created partly as a response to increased transnational restructuring brought about by the [Single European Act](#).

European Works Councils provide representatives of workers from all European countries in big multinational companies a direct line of communication to top management. They make sure that workers in different countries are all told the same thing at the same time about transnational policies and plans.

Now you will find the member of Solvay's European Works Council:

Secretary

Select Committee

Enlarged Select Committee

EWC Members
