

Not able to login with EntraID to Syensqo Wiki

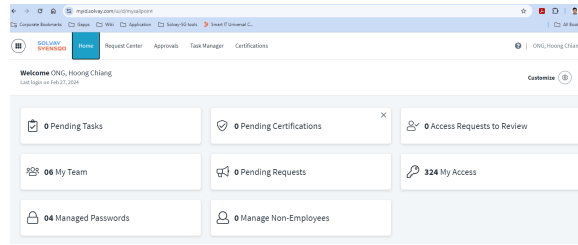

I am a Solvay User and I unable to login via the EntraID to Syensqo's Wiki.

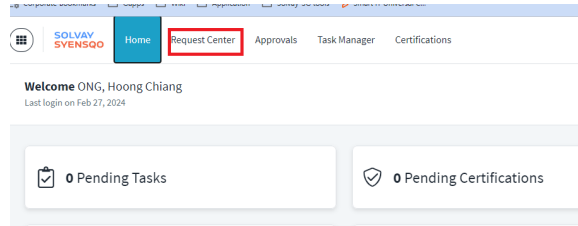

The reason for having this issue is because your Solvay account is not yet trusted to be login via Syensqo's EntraID.

1. Make sure you are a Solvay user with TSA permission.

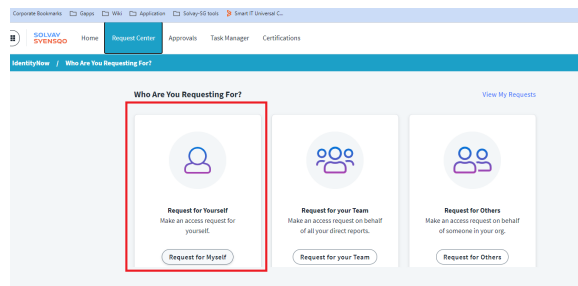

2. Go to <https://myid.solvay.com>

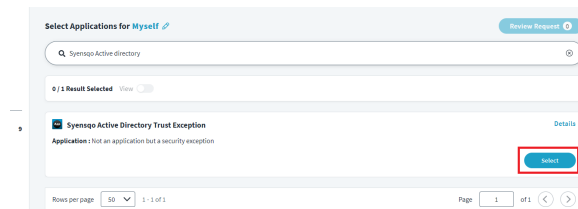

2. Click on the "Request Center".

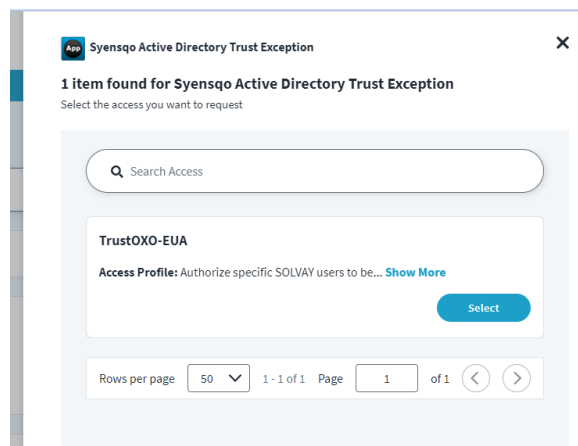

5. Click on "Request for Yourself"

6. Search for "Syensqo Active Directory Trust Exception" and click on "Select" button.

7. Click on the Select button for the "TrustOXO-EUA". Enter the reason into the comment and save the selection.

The MyID team will take less than a day to get this trust established with Syensqo's AD.

If you have any question about the MyID progress, please check with the MyID team.
