

AM Commercial Materials

Syensqo has developed and commercialized multiple materials for Additive Manufacturing. There is also a specific Syensqo website devoted to AM. [This website can be found here](#). Currently, there are six commercial filament products:

Material	Version	Technical Data Sheet Link	Image
Unfilled Radel® Polyphenylsulfone (PPSU)	Industrial	TDS Link	
	Healthcare		
Unfilled KetaSpire® Polyetheretherketone (PEEK)	Industrial	TDS Link	
	Healthcare		
10% Carbon-Filled KetyaSpire® Polyetheretherketone (PEEK)	Industrial	TDS Link	
	Healthcare		

Additionally, Syensqo has partnered with many filament printer manufacturers in order to develop a network of printers available for our customers that can print our materials. This partnership and evaluation system is termed Syensqo's Printer Evaluation Program (S-PEP). [A White Paper of the results of this program can be found here](#).

Finally, Syensqo also offers purchase of commercial filament through an AM Webshop: a web-based portal that allows for online purchase of these filaments. [This website can be found here](#).
