<< New Financial Scheme implementation >>

1. Objective and Scope

1.1. Objective of this Operation

The aim of this operation is to describe all the necessary steps to take into consideration when a new financial scheme is needed for reporting purposes. The articulation between actors during the implementation of the new scheme is crucial to have the information consistent.

1.2. Scope

The scope of this operation is PF1, WP1 and PI1 ERP systems.

2. Definitions

See [Finance Glossary](#):

- ...

3. Tasks description

Service Unit Finance Financial Accounting team receives a request with the need of a new financial scheme to be implemented in SAP environments. This team analyses the request and liaise with all concerned actors to have all the detailed information. With this information, a new scheme can be built in the impacted SAP environment and must be aligned with the BFC reporting features. All must be tested, either in SAP environments (quality systems) either in BFC reporting tool.

Active actors are Group Accounting and Reporting team, SU FAC GL team and SU FA BFC Admin team, as well as Digital Technology.

3.1. I receive a request for information with the need of a new Financial Scheme

3.1.1. I receive a request for information with the need of a new Financial Scheme

I receive a request for information with the need of a new Financial Scheme. The triggering agent for this should be Group Accounting and Reporting team. Usually the first contact email has all the information needed but, in case of any doubt, questions should be addressed back to GAR team.

Hello Caroline and all,

please find attached the specs for the new LT accounts to be created for the financial instruments (1st tab) and a new LT account currently used only by Solvay Hortensia (2nd tab; this is an asset part of the net debt definition).

As you will see, the new accounts for the financial instruments are exactly the mirror of the existing short term accounts.

As we don't want to change the subtotal structure for the time being we will link the long term financial instruments related to financing (A16111) to the STC-A320, but this will have to be modified in the future.

Last try: is it really so time consuming to adapt the subtotals, too in time for the november close?

I challenge because, as we said, it would be best to handle these changes once and for all.

If anything is missing or unclear, please let me know.

Thanks and best regards,
Mario

Dear all,

quick notes taken last week - for sharing with the ones who did not attend that call but who will work on the topic

- agreed to create 4 missing LT Financial Instruments accounts - please confirm if possible quickly my understanding below is correct (codes and description) (I saw parallel mails mentioning other accounts, I am a bit confused at the moment)

3.1.2. I analyse the request received for new reporting needs

I analyse the request received for the new Financial scheme and try to identify if there are already other similar Financial Scheme set in place.

In case similar Financial Schemes already exists and are set up, we can use the same methodology to set it up.

For instance, if there is the need to create new headings for a Long Term heading and there is already a Short Term heading in use, I should identify:

- BFC Dimension by scheme:
 1. I need to identify which will be the families impacted (IC for Interco only, B2 for ACTUAL2, etc.)
 - a. B2 BFC quarterly ACTUAL2

5. I should confirm the flows to be available in BFC, in order to identify the set of flows in BFC customizing.

By doing so, the accounts and headings will be available in the GR55 Z4F1 Balance sheet report, with IFRS data.

Whenever there are new headings and new GL accounts, please make sure that the F.01 transaction Financial Statements reflected the new data.

SU FA GL team is responsible for the update of the ZSSA (F.01 PF1) and ZMAS (F.01 WP1) Financial Statement versions. Usually the update of both F.01 ZSSA and ZMAS is being done automatically, since the sets are organized by ranges. However, a check must be done in order to be sure no account is excluded from it.

For Local GAAP, CAMs have the privileges to perform the changes or the delegate from Accounting Platform.

- in which packages is the heading to be included (for instance:
 - L1005 Balance sheet (aggregate report - retrieve only)
 - L2005 Balance sheet - Assets
 - L7010 Balance sheet - By flows
 - L3060 Special operations
 - L5605 Non current Assets - Intercompany
 - L5615 Non current liabilities - Intercompany;
- Node and Subnode to be included in

(for instance:

Node: ZFC-A270 Other n/current financial assets, Net

Subnode: ZFC-A270-G Other n/current financial assets, Gross

3.2.2. I ask for adjustments in Quality systems QF1, WQ1 and QI1 PF1/WP1/PI1 target systems

I ask for the adjustments in Quality systems; either QF1, WQ1 and QI1, according to the impacted company codes/systems.

These adjustments are to be asked to Digital Technology department, through the active ticketing tool. (at this time, Service One Digital Workplace > IT - General Accounting & Close (GAC)/Treasury & Invoice to Cash (TITC)/ Other processes.

In the request, I share the modifications needed, namely update of tables or set of accounts.

Example:

update of SM30 table ZZF_BFC_HEADING/ZZF_BFC_SETACCT

update of set of accounts ZFC-BALANCE

IT - General Accounting & Close (GAC)/Treasury & Invoice to Cash (TITC) / Other processes

Greg,

For Actual3 I have 2 questions regarding these new financial instruments headings :

1. On which type of interest rate must these financial instruments be declared (Fixed, variable or no rate) ?
2. Does these financial instruments bear any interests ?

3.3.2. I perform testing in SAP environments to guarantee adjustments meet the need of the new Financial Scheme

I perform testing in SAP environments to guarantee adjustments meet the expected results.

The tests should be done in all systems and tacking all the three regions, EMEA, APAC and NAM/LAM.

In order to avoid regression in other families, double check that the newly created headings are listed in the BFC Families accordingly (table ZZF_BFC_HEAD_V) , as well as the set of accounts (table ZZF_BFC_SETACCTV).

Book the testing documents in SAP and run all the interfaces transactions, in order to certify the interface is collecting the right data, with the necessary dimensions and right sign.

Example from QF1, APAC company.

I share that all testing has been done according to the request and that adjustments were made available in production systems. This communication must address:

- GAR team;
- BFC Admin team;
- team responsible for SAP vs BFC file RPA.
