

Syensqo's Learning & Development tools

Syensqo's Learning & Development tools

INTRODUCTION

Subject Matter Experts who facilitate training can gain access to our internal content creation tools to create and publish digital courses on YOUTGROW. Learn more about our content creation tools below;

TOOLS

Our Global Learning Management System, **YOUTGROW**, is the primary tool for training enrollment. Explorers and Managers can access YOUTGROW from Syensqo's HUB and browse our catalog, enroll in courses, request new classes and more. Managers have access to the Manager Dashboard to review and assign training to their teams.

On the YOUTGROW platform explorers will discover a collection of content from internal and external subject matter experts. At Syensqo individual experts have the opportunity to contribute knowledge and manage training.

IsEasy, which is a Cloud-based authoring tool with which you can create interactive and professional e-learning courses.

- Why should you use it?
 - Create professional and interactive e-learning
 - Dynamic trainings
 - Create courses
- How do you install IsEasy?
 - IsEasy is a cloud-based tool so there is no installation needed.

You can request a license through Service One in the Service request "**Application Access Request (Generic)**".

To note that access requests and administrator subjects related to the tool, Digital Technology area should be contacted and they will provide support.

Wevideo, which is a web-based video editing and recording application that allows you to easily create videos. This is a semi-professional tool, accessible to beginners.

- Why should you use it?
 - Promotion/communication on a project
 - Team communication
 - Tutorial
- How do I install Wevideo?
 - Wevideo is a cloud-based tool so there is no installation needed.

You can request a license through the **Service One application request**.

It is really important that you tell us how long your project will last. We have put in place a rolling system for the license to allow more people to create videos throughout the company.

To note that access requests and administrator subjects related to the tool, Digital Technology area should be contacted and they will provide support.

Vyond, which is a Cloud-based authoring tool with which you can create interactive videos.

- Why should you use it?
 - Promotion/communication on a project
 - Team communication
 - Tutorial
- How do you install Vyond?
 - Vyond is a cloud-based tool so there is no installation needed.

You can request a license through Service One in the Service request "**Application Access Request (Generic)**".

To note that access requests and administrator subjects related to the tool, Digital Technology area should be contacted and they will provide support.

If you are new to Syensqo's Wiki space, you may need to link your Google Drive in order to see embedded documents.

Follow the instructions **here**.
