

Consignment plant -> Shipto transco

In SAP there are 2 types of consignment:

a) Direct Customer

This case doesn't require any more specific actions (= no issue) than those defined in previous image.

b) Through a Consignment plant

For this one, the solution is to:

• Case 1b : Consignment Plants - SAP - Dynasys Solutions

SAP FLOWS

SOLUTION # 1 - We won't manage the consignment plant - Default solutions for All GBUs

Actions to be done:

- Set the Main Shipping site in DP (from Clamecy instead of OIES)
- Deactivate OIES SKU in DIP
- Add the link Plant-customer in BW C_PLNTCON object (SBS/BW)

Dynasys to SAP:

- Set the Forecast for this DFU in DP => Independent requirements in Clamecy
- Set the consumption Z4 in SAP to consume the indep requirement with the STO from Clamecy to OIES

The link "Plant-Customer" is done in BW C_PLNTCON object.

C_PLNTCON

C_PLNTCON is basically in charge of transcoding data at Consignment Plant to Final Shipto

- C_PLNTCON: is an 'Exception table' that is stocked in BW
- It contains Consignment plant x Final shipto duplets. Only used by Silica so far.
- It is used to transco data from Consignment plant to Final shipto. Example: Deliveries/Sales Orders where the Receiving site is the Consignment plant will be reassigned to the Final shipto (basically, we change the code of the Receiving site from Consignment plant to Shipto code)

"C_PLNTCON", List output

OLOGSYS	Plant Consignation	Final Shipto Code (DYN)
WP1_400	7628	0000066911
WP1_400	7629	0000066833
WP1_400	8000	0000066946
WP1_400	8039	0000057300
WP1_400	8040	0002017796
WP1_400	8061	0000066852

- Impact on: BW DiP files, mainly FS / ITI / SOB
- 2 changes are planned before BW freeze on June 25th 2021 :
 - a) Source:
 - AS IS: manually fed 'on demand' by BW team (or JC)
 - TO BE: defined in DiP and exported to SQL/BW (EXP_DIP_CONS_PLANT)

1. b) Scope/Impact:

AS IS: FS / ITI / SOB / AS
 TO BE: FS / ITI / SOB / AS + PSTOCK CSTOCK + EOMSTOCK -> EOMCSTOCK

Who: Ismail on BW, JC/Pablo/Min on SAP/Dyn side

For more info about PSTOCK to CSTOCK + EOMSTOCK to EOMCSTOCK transfer, please consult [Actual & Current Customer Stock \(EOMCSTOCK & CSTOCK\)](#) section

More info on BW/Dyn spec #A309 Plant consignment <-> Shipto
