

Aodocs Library - IS SCMS

What is it?

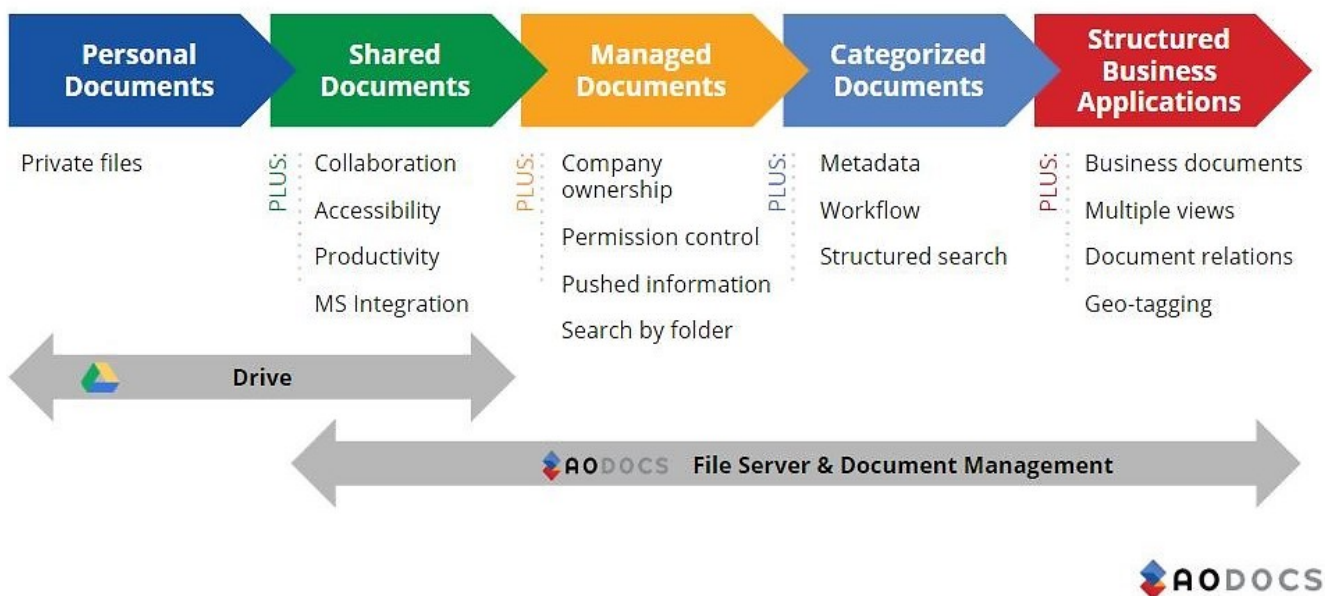

AODocs is a **cloud Document management solution** on top of Google Drive with significant enhancement in security management, sharing control, specific search and other new features such as categorization, workflow and versioning.

Aodocs **secures content** sustainability over time, **transferring the ownership to Solvay**, which allows an optimal collaboration within the Group, but also with partners.

[i The link to IS-SCMS Library here i](#)

Why using it?

- AODocs is a document management system that **integrates with Google Drive with a central control of access rights**
- It allows **structuration and categorization of documents** through added properties (metadata), structured views and advanced search capabilities
- Aodocs transfers document **ownership to a corporate account** which enables the collaboration within larger teams, entities and with partners
- AODocs has the ability to handle a **workflow** to track and control documents lifecycle
- **Confidential documents** may be stored in Aodocs

How to use it?

I want to create a Google or a Word document, where do I put it? In this [Solvay One article](#), you will be able to know when to use Aodocs or not!

Best Practices

★ Add [IS-SCMS Library](#) to your favorites

★ Fill in the **metadata** when creating a document

Metadata is an **extra-information** you can add into your documents. It is a field providing information to a specific document. Properties can be used to **structure documents**. To **improve the search experience** or to **customize the workflow**.

★ Make a **research** by using the different "**views**" :

★ **Keep updated Google Groups** : /\ As a reminder, documents access are not the same as in Gdrive /\ Then, we based all the security of our Aodocs Library upon the Google Groups. In this way, it's really important to update Google Groups be so that nobody lost or can't access files/folders.
